Polymer Nanocomposites for Advanced Engineering and Military Applications Ramdani, Nouredine, 2019-04-01

The field of polymer nanocomposites has become essential for engineering and military industries over the last few decades as it applies to computing sensors biomedical microelectronics hard coating and many other domains Due to their outstanding mechanical and thermal features polymer nanocomposite materials have recently been developed and now have a wide range of applications Polymer Nanocomposites for Advanced Engineering and Military Applications provides emerging research on recent advances in the fabrication methods properties and applications of various nano fillers including surface modification methods and chemical functionalization Featuring coverage on a broad range of topics such as barrier properties biomedical microelectronics and matrix processing this book is ideally designed for engineers industrialists chemists government officials military professionals practitioners academicians researchers and students Green

Biopolymers and their Nanocomposites Dhorali Gnanasekaran, 2019-07-06 This book comprises a collection of chapters on green biopolymer nanocomposites The book discusses the preparation properties and applications of different types of biodegradable polymers An overview of recent advances in the fabrication of biopolymers nanocomposites from a variety of sources including organic and inorganic nanomaterials is presented The book highlights the importance and impact of eco friendly green nanocomposites both environmentally and economically The contents of this book will prove useful for students researchers and professionals working in the field of nanocomposites and green technology **Nanostructured**

Polymer Blends Sabu Thomas, Robert Shanks, Sarath Chandran, 2013-11-28 Over 30% of commercial polymers are blends or alloys or one kind or another Nanostructured blends offer the scientist or plastics engineer a new range of possibilities with characteristics including thermodynamic stability the potential to improve material transparency creep and solvent resistance the potential to simultaneously increase tensile strength and ductility superior rheological properties and relatively low cost Nanostructured Polymer Blends opens up immense structural possibilities via chemical and mechanical modifications that generate novel properties and functions and high performance characteristics at a low cost The emerging applications of these new materials cover a wide range of industry sectors encompassing the coatings and adhesives industry electronics energy photovoltaics aerospace and medical devices where polymer blends provide innovations in biocompatible materials This book explains the science of nanostructure formation and the nature of interphase formations demystifies the design of nanostructured blends to achieve specific properties and introduces the applications for this important new class of nanomaterial All the key topics related to recent advances in blends are covered IPNs phase morphologies composites and nanocomposites nanostructure formation the chemistry and structure of additives etc Introduces the science and technology of nanostructured polymer blends and the procedures involved in melt blending and chemical blending to produce new materials with specific performance characteristics Unlocks the potential of nanostructured polymer blends for applications

across sectors including electronics energy photovoltaics aerospace automotive and medical devices biocompatible polymers Explains the performance benefits in areas including rheological properties thermodynamic stability material transparency solvent resistance etc

Science, Technology and Innovation in BRICS Countries Swapan Kumar Patra,Mammo Muchie,2020-06-09 The term BRICS Brazil Russia India China and South Africa is gaining global attention both in scholarly and popular discourse BRICS countries are crucial in terms of their vast areas huge population and have massive economic potential These countries are also categorized as developing countries and are aspiring to be considered as developed countries There is commonality among these countries in that they have similar issues and problems which may require common solutions Science Technology and Innovation in BRICS Countries examines whether more emphasis on Science Technology and Innovation STI capability building could be the solution to these countries economic upgradation and poverty reduction This book is a collection of various Science Technology and Innovation STI issues of BRICS economics and will be of interest to general readers scholars working in this field as well as policy makers all over the globe The contributions come from various scholars across the globe who have published their BRICS economics research in a special issue of the African Journal of Science Technology Innovation and Development

Polymers and Two-Dimensional Nanocomposites Rotimi Sadiku,Yskandar Hamam,Suprakas Sinha Ray,Oladipo Folorunso,2024-11-23 Polymers and Two Dimensional Nanocomposites provides a detailed review of recent progress in this important research field The chapters cover new developments in synthesis methods fabrication techniques sample preparation methods surface modification characterization methods of enhancing the properties of these materials and industrial applications in energy environmental oil and gas sensors corrosion biomedical and structural applications The book provides a valuable reference resource for academic and industrial researchers materials scientists and engineers working in the fields of polymer science and engineering polymer composites and nanocomposites Covers recent developments in synthesis characterization properties and applications Discusses new fabrication techniques and how to select the right processing conditions Systematic presentation of theoretical and experimental investigation of properties for various industrial applications Attention is given to current challenges and future improvements

Tourism in Rural Protected Areas Kaitano Dube,Ikechukwu O. Ezeuduji,Magdalena Petronella Swart,2025-06-30 Despite its potential to unlock socio economic benefits in rural and protected areas in a manner that addresses the Sustainable Development Goals SDG rural and protected areas tourism is yet to be thoroughly examined by academics scholars practitioners and policymakers This lack of exploration has undermined the potential benefits associated with tourism development in rural and protected areas Given the complexity of rural tourism this contributed volume explores current and future debates on the subject using cases in Southern Africa The book is useful for various audiences including tourism academics planners cultural and heritage practitioners and rural development planners The topics covered include gender transformation service delivery visitor experience wildlife tourism and host community tourism interaction

Management and Practices of Pilgrimage Tourism and Hospitality Gupta, S.K., Aragon, Lilibeth C., Kumar, Pankaj, Madhurima, Ramasamy, Rajesh, 2023-10-09 Pilgrimage is one of the oldest extant and most basic forms of population mobility known to human society and its political social cultural and economic implications have always been and continue to be substantial In recent decades a new focus on pilgrimage has emerged through the lens of tourism which explores the political cultural behavioral economic and geographical impacts Therefore the identification of challenges in transformation and emerging ways and means of managing pilgrimage and related destinations is critical in an era of crises and disastrous situations Management and Practices of Pilgrimage Tourism and Hospitality identifies understands and recognizes the changing facts and facets of pilgrimage tourism around the world It develops and promotes pilgrimage tourism for community integration faith sharing perseverance tolerance and pace for secular and sustainable futures This book further identifies any new issues scopes challenges and entrepreneurial opportunities for pilgrimage tourism as are found to be relevant and important for future pilgrimages with larger intensity and frequency Covering topics such as behavioral challenges community empowerment and pilgrimage economy this book is an essential resource for entrepreneurs professionals researchers academicians policymakers students of higher education sociologists and more Research Anthology on Military and Defense Applications, Utilization, Education, and Ethics Management Association, Information Resources, 2021-05-28 Military technology is highly advanced in terms of technology being used in the field computer applications artificial intelligence and software applications These high performance technologies range from weapons to communications technology to automation in vehicles and weaponry These technologies must be both secure and reliable in harsh environments Research is being focused specifically on that including how military and defense applications operate what modern technologies are being used and the ethics surrounding these applications A holistic view of these applications is necessary for both understanding current military tactics and tools along with the future applications The Research Anthology on Military and Defense Applications Utilization Education and Ethics focuses specifically on military and defense operations expenditure technologies and tools and the ethics surrounding technologies like weaponry and artificial intelligence in the military The chapters cover a wide and diverse range of military and defense applications while providing crucial information on the functions security and reliability of these technologies Beyond an understanding of the applications themselves this book also focuses on military education surrounding these technologies and the ethics of usage to provide a well rounded understanding of research in the field This book is ideal for military consultants military personnel defense agencies national security agencies government officials defense personnel policymakers military educators and trainers stakeholders practitioners researchers academicians and students interested in the latest research in military and defense applications *The African Union Ten Years After* Muchie, Mammo, Lukhele-Olorunju, Phindil, Akpor, Oghenerobor B. , 2013-10-20 This book looks at the first ten years of the African Union This is the second in a series of books that will be

produced each year from annual conferences held on the multi faceted issue of African liberation The key themes of the book explore ways of improving the effectiveness of the African Union fostering unity amongst African countries through entrenchment of pan Africanism and building ownership of the African Union by the African people and their communities In addition the thoughts of key figures of pan Africanism and black emancipation such as Sylvester Williams and Franz Fanon are re positioned to even greater contemporary relevance Through its promotion of Ethiopianism pan Africanism and the African renaissance we trust that this book will add new interest and a fresh perspective to how Africans move forward together into a post colonial era where policies and actions are determined by the united agency of liberated Africans the world over

Deanship in the Global South Oliver J.J. Seale,2021-02-08 The university today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats Deanship in the Global South Bridging Troubled Waters is about the deans lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership development within their critical bridging roles between the academe and administration

Metallurgical Advances in Coatings and Corrosion Ojo S.I. Fayomi,2024-12-31 This book offers a unique narrative and provides insights into the innovative solutions pertaining to corrosion in industrial settings From safeguarding maritime structures to enhancing the performance of diesel engine bearings in harsh environments the anthology explores various facets of corrosion mitigation and materials enhancement Chapters delve into topics such as protective coatings electrodeposition techniques alloying effects and electrochemical dynamics crucial for understanding corrosion mechanisms and resistance Features Offers a comprehensive exploration of metallurgy and corrosion research providing insights into various aspects of materials science and engineering advancements Covers diverse topics such as protective coatings electrodeposition alloying effects and electrochemistry Each chapter presents real world applications and solutions to corrosion related challenges offering actionable insights that can be applied in industrial settings Focuses on metallurgical advancements and corrosion mitigation strategies Reviews sustainable production health and environmental impacts This book is aimed at graduate students and researchers in materials and metallurgical engineering

Cases on Technology Enhanced Learning through Collaborative Opportunities Mukerji,

Siran,Tripathi, Purnendu,2010-03-31 The collection of cases in the book analyzes and evaluates how organizations and institutions of learning in the developing and developed world are adapting to technology enhanced learning environments and exploring transnational collaborative opportunities Provided by publisher **Research Anthology on Synthesis, Characterization, and Applications of Nanomaterials** Management Association, Information Resources,2021-03-19 The use of nanotechnologies continues to grow as nanomaterials have proven their versatility and use in many different fields and industries within the scientific profession Using nanotechnology materials can be made lighter more durable more reactive and more efficient leading nanoscale materials to enhance many everyday products and processes With many different sizes shapes and internal structures the applications are endless These uses range from pharmaceuticals to materials such as cement or cloth electronics environmental sustainability and more Therefore there has been a recent surge of research focused on the synthesis and characterizations of these nanomaterials to better understand how they can be used their applications and the many different types The Research Anthology on Synthesis Characterization and Applications of Nanomaterials seeks to address not only how nanomaterials are created used or characterized but also to apply this knowledge to the multidimensional industries fields and applications of nanomaterials and nanoscience This includes topics such as both natural and manmade nanomaterials the size shape reactivity and other essential characteristics of nanomaterials challenges and potential effects of using nanomaterials and the advantages of nanomaterials with multidisciplinary uses This book is ideally designed for researchers engineers practitioners industrialists educators strategists policymakers scientists and students working in fields that include materials engineering engineering science nanotechnology biotechnology microbiology drug design and delivery medicine and more New Models for Technical and Vocational Education and Training Makgato, Moses,Afeti, George,2020-12-18 Technical and vocational education and training at technical schools are major contributing factors in combating poverty unemployment and inequality The primary purpose of technical and vocational education and training is to prepare students and learners for the world of work and for a smooth transition from education institutions into the workplace As the Fourth Industrial Revolution continues to create more radical changes in the labor market experts are calling for a reform of education including vocational education and training and adult and professional education New Models for Technical and Vocational Education and Training is an essential scholarly research book that examines TVET and CET colleges and programs that provide intermediate skills to enhance students chances of employability and entrepreneurship in Industry 4 0 The book explores knowledge in respect to workforce preparation digital skills development teaching and learning of TVET flexibility and articulation of TVET to respond to work integrated learning and reskilling and upskilling to avoid skill mismatches It is ideal for TVET schools academicians curriculum designers managers training officers administrators vocational professionals researchers and students Strategic Information Technology Governance and Organizational Politics in Modern Business Iyamu,

Tiko,2015-07-17 Individually the fields of organizational politics and strategic information technology have soared in popularity Studies suggest that the interaction between the two would prove beneficial to both the academic and corporate domains This integration would serve to enable support and manage modern businesses Strategic Information Technology Governance and Organizational Politics in Modern Business gives voice to fresh perspectives on the development implementation and practice of information systems and technology in organizations This book is beneficial for business people undergraduate students postgraduate candidates and researchers looking to gain a more in depth understanding of the influence of socio technical factors on ICT operations **The Arts and Indigenous Knowledge Systems in a**

Modernized Africa Runette Kruger,Rudi de Lange,Ingrid Stevens,2018-12-17 This collection derives from a conference held in Pretoria South Africa and discusses issues of indigenous knowledge systems IKS and the arts It presents ideas about how to promote a deeper understanding of IKS within the arts the development of IKS arts research methodologies and the protection and promotion of IKS in the arts Knowledge embedded in song dance folklore design architecture theatre and attire and the visual arts can promote innovation and entrepreneurship and it can improve communication IKS however exists in a post millennium modernizing Africa It is then the concept of post Africanism that would induce one to think along the lines of a globalized cosmopolitan and essentially modernized Africa The book captures leading trends and ideas that could help to protect promote develop and affirm indigenous knowledge and systems whilst also making room for ideas that do not necessarily oppose IKS but encourage the modernization not Westernization of Africa **Case Studies in**

Innovation for Researchers, Teachers and Students Heather Fulford,2012 Many would say that innovation is a major driving force in our economy but they would be wrong Innovation has driven life on earth for about 4 billion years Thus there is no reason to wonder why it is so very important in all aspects of our lives As academics we are interested in studying innovation from many different perspectives But the subject is not only of interest to academics Both industry and government can obtain distinct advantage from innovation There is also the public services sector and the NGOs as well It is essential to remember that innovation is not a solitary activity it is intensely based on relationships which are a key to its success Heather Fulford is a leading authority on innovation and she has selected 10 important pieces of research which she believes will be of use to all interested readers The ten cases and research studies presented in this volume serve to illustrate the reach and scope of innovation Readers researchers teachers and students will find this book very rewarding

Nanofillers for Binary Polymer Blends Sabu Thomas,Soney C. George,Sharika T. Nair,2024-06-28 Nanofillers for Binary Polymer Blends covers major advances in the field of polymer blend nanocomposites The book encompasses the fundamentals of polymer blends various nanofillers experimental techniques used in their fabrication the characterization of various polymer blend nanocomposites and theoretical evaluations of various properties The properties and potential applications that have been achieved in various polymer blends by the addition of nanofillers are also highlighted

Applications for commercial products including automotive parts packaging construction materials biotechnology medical devices building materials computer housings car interiors etc are also covered in detail This is an important reference source for materials scientists and engineers looking to increase their understanding of how nanofillers are being used in polymer blends Outlines the various types of nanofillers explaining how the properties of each enhances the morphology rheology mechanical dynamic mechanical viscoelastic electrical and thermal properties of polymer blends Provides information on the theory modeling and simulation of nano filled polymer blends Assesses the mechanism of selective localization of nanofillers in polymer blends the effect of localization of nanofillers on the microstructure and the relative performance of polymer blends

Research Anthology on Vocational Education and Preparing Future Workers

Management Association, Information Resources,2022-04-08 Many students across the globe seek further education for future employment opportunities Vocational schools offer direct training to develop the skills needed for employment New emphasis has been placed on reskilling the workforce as technology has infiltrated all aspects of business Teachers must be prepared to teach these new skill requirements to allow students to directly enter the workforce with the necessary competences intact As the labor market and industry are changing it is essential to stay current with the best teaching practices within vocational education courses to provide the future workforce with the proper tools and knowledge The Research Anthology on Vocational Education and Preparing Future Workers discusses the development opportunities and challenges of vocational education courses and how to best prepare students for future employment It presents the best practices in curriculum development for vocational education courses and analyzes student outcomes Covering topics such as industry academia collaboration student satisfaction and competency based education this major reference work is an essential resource for academic administration pre service teachers educators of vocational education libraries employers government officials researchers and academicians

Learning to teach in post-apartheid South Africa
