Post-Colonial Realism Hanna Samir Kassab, 2025-08-22. In *Post Colonial Realism* Hanna Samir Kassab develops a theoretical framework to explain, understand and predict international conflict, placing culture at the center of international political analysis. Kassab contends that nationalism, a belief system, forms an intervening variable that shapes the foreign policy behavior of states. Studying food is central to understanding nationalist belief systems that shape international politics. By combining theories of nationalism with post colonialist understandings of cultural revitalization, Kassab conceptualizes state motivation to understand how cultural symbols shape nationalist identities to see the fault lines of civilization through food and to appreciate the centrality of identity issues. Using ethnography to understand food ownership as part of nationalist conflict, Kassab examines neighboring states: Greece, North Macedonia, Turkey and Armenia alongside India. In each country study chapter, he compares at least two nationalisms and views of cuisine ownership. He later maps out potential future flashpoints as the international system becomes increasingly competitive due to the changing structure of the international system: unipolarity to multipolarity. Post Colonial Realism offers a more robust and flexible theory of international relations, concentrating not on abstractions but on individuals and their collective beliefs. **Turkey** Christopher Mitten, 2002.

Describes the history, geography, economy, government, religious and social life, language and culture, various famous people and outstanding tourist sites of Turkey. Includes a recipe for Turkish lemonade. **Food in Motion** Alan Davidson, 1983.
