The Sidereal Messenger of Galileo Galilei and a Part of the Pref. to Kepler's Dioptrics Galileo Galilei, 1960 **The Sidereal Messenger (Illustrated Original Edition)** Galileo Galilei, 2020-11-17 Galileo Galilei had seriously considered the priesthood as a young man at his father's urging he instead enrolled at the University of Pisa for a medical degree 20 In 1581 when he was studying medicine he noticed a swinging chandelier which air currents shifted about to swing in larger and smaller arcs It seemed by comparison with his heartbeat that the chandelier took the same amount of time to swing back and forth no matter how far it was swinging When he returned home he set up two pendulums of equal length and swung one with a large sweep and the other with a small sweep and found that they kept time together It was not until Christiaan Huygens almost one hundred years later however that the tautochrone nature of a swinging pendulum was used to create an accurate timepiece 21 To this point he had deliberately been kept away from mathematics since a physician earned so much more than a mathematician but upon accidentally attending a lecture on geometry he talked his reluctant father into letting him study mathematics and natural philosophy instead 21 He created a thermoscope forerunner of the thermometer and in 1586 published a small book on the design of a hydrostatic balance he had invented which first brought him to the attention of the scholarly world Galileo also studied disegno a term encompassing fine art and in 1588 attained an instructor position in the Accademia delle Arti del Disegno in Florence teaching perspective and chiaroscuro Being inspired by the artistic tradition of the city and the works of the Renaissance artists Galileo acquired an aesthetic mentality While a young teacher at the Accademia he began a lifelong friendship with the Florentine painter Cigoli who included Galileo's lunar observations in one of his paintings Galileo Galilei's Sidereus Nuncius is arguably the most dramatic scientific book ever published It announced new and unexpected phenomena in the heavens unheard of through the ages
