Reconceptualizing Early Mathematics Learning Lyn D. English, Joanne T. Mulligan, 2013-05-09 This book emanated primarily from concerns that the mathematical capabilities of young children continue to receive inadequate attention in both the research and instructional arenas Research over many years has revealed that young children have sophisticated mathematical minds and a natural eagerness to engage in a range of mathematical activities As the chapters in this book attest current research is showing that young children are developing complex mathematical knowledge and abstract reasoning a good deal earlier than previously thought A range of studies in prior to school and early school settings indicate that young learners do possess cognitive capacities which with appropriately designed and implemented learning experiences can enable forms of reasoning not typically seen in the early years Although there is a large and coherent body of research on individual content domains such as counting and arithmetic there have been remarkably few studies that have attempted to describe characteristics of structural development in young students mathematics Collectively the chapters highlight the importance of providing more exciting relevant and challenging 21st century mathematics learning for our young students The chapters provide a broad scope in their topics and approaches to advancing young children s mathematical learning They incorporate studies that highlight the importance of pattern and structure across the curriculum studies that target particular content such as statistics early algebra and beginning number and studies that consider how technology and other tools can facilitate early mathematical development Reconceptualising the professional learning of teachers in promoting young children s mathematics including a consideration of the role of play is also addressed **110**

Amazing Apps for Education Rane Anderson, 2012-02-01 Here s an easy to use quick reference guide for apps that supplement student learning It gives suggestions for how teachers can implement each app in the classroom and for how parents can use the apps at home to extend their child s learning This resource is correlated to the Common Core State Standards is aligned to the interdisciplinary themes from the Partnership for 21st Century Skills and supports core concepts of STEM instruction 136pp The Effects of Rocket Math on the Automaticity of Multiplication Basic Facts in Fifth Grade Students Meagan Rolfes, 2011 The purpose of this study was to measure the effects of Rocket Math on the automaticity of basic multiplication facts in 5th grade students The action research project took place in a 5th grade classroom The students used Rocket Math over a nine week period This nine week study consisted of 22 5th grade students 12 male and 10 female

All students received the treatment and data was collected on students whose pre test scores were below 20 % The data collection group consisted of three males and four females A teacher designed assessment was used as the pre test and post test to determine growth Students participated in the treatment three days per week by taking a one minute timed test A two minute timed test was administered weekly to monitor progress Teacher anecdotal notes were kept to record observations during the study Results from the post test indicated an increase in the number of correct answers given during a two minute test Results for this study indicate a possible gain in automaticity of basic multiplication facts Further research is needed to determine if the conclusions of this study would be applicable to a generalized population **My iPad for Kids Sam**
