

## GETTING STARTED

To install batteries, position the Receiver as illustrated, press the  mark and slide the battery compartment cover off. Take out the battery holder.

Put six fresh AA batteries in the battery holder, making sure to match polarity markings inside the holder with markings on the batteries (+ to + and - to -).

Replace the battery holder and the battery compartment cover.

We recommend that you use

rechargeable nickel-cadmium AA batteries, catalog number 23125, or AA alkaline ENC R C144, catalog number 23562.

Low battery indicator appears when the battery is low. Replace or recharge the batteries.

### ANTENNA

Adjust the flexible antenna to ANT corrector. Rotate the metal portion clockwise (looking from top) to secure.

## MEMORY BACKUP

Memory back-up starts functioning the second you supply power to your PRO-31 (with batteries or external power) and continues even when the power switch is turned "Off."

Even after removing the batteries or external power, the memory will be backed up for approximately one hour.

When the batteries are low (low battery indicator on), the

memory back-up will operate for

up to three months. However, since weak batteries can leak, you should replace them and avoid damage to your scanner.

### RESET SWITCH

If the LCD fails to work properly just after you connect new batteries or external power to your PRO-31, use the Reset Switch.

Remove the batteries and all external power. Then use a ball point pen, etc. to push the Reset switch through the hole on the bottom of the battery compartment.

When the reset switch is pushed, all frequencies will be cleared to "000.000," requiring you to re-enter your desired frequencies.

Insert the battery holder and return to normal operation.

You can use your PRO-31 with an external mobile antenna or outdoor base antenna by using the BNC connector, after you remove the flexible antenna.

## OPERATING YOUR PRO-31

Turn on your PRO-31 by rotating **YOUR** clockwise.

(When first turned on, your PRO-31 might start scanning.)

Rotate **SQL/CLK** fully counter-clockwise. You'll hear a rattling noise from the speaker. Slowly rotate **SQL/CLK** clockwise until the noise stops. You're now ready to start entering frequencies!

### Understanding the Display

The liquid crystal display (LCD) on your PRO-31 can display the channel number, the frequency being received, and the status of different functions. There's a brief rundown on what the LCD symbols mean when receiving stations.
