The Vacuum Cleaner Carroll Gantz, 2012-10-05 House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor performed mostly by women Mechanical carpet sweepers were replaced by manual suction cleaners which in turn were replaced by electric vacuum cleaners in the early 20th century Innovative inventors who improved vacuum cleaners as electricity became commonly available made these advances possible Many early manufacturers failed but some such as Bissell Hoover Eureka and others became household names as they competed for global dominance with improved features performance and appearance This book describes the fascinating people who made this possible as well as the economic cultural and technological contexts of their times From obscure beginnings 200 years ago vacuum cleaners have become an integral part of modern household culture *Manual of Clinical Microbiology* Patrick R. Murray, 1995 For the past 28 years the Manual of Clinical Microbiology has been recognized as the benchmark for excellence among microbiology books The sixth edition of this book once again provides the definitive reference work for running an effective state of the art diagnostic laboratory presenting a more direct approach to organizing information with thorough but concise treatments of all the major areas of microbiology including new microbial discoveries changing diagnostic methods and emerging therapeutic challenges facing clinicians Increased emphasis has been given to infection control and the role of molecular diagnostic procedures and it contains the very latest and authoritative work on phylogenetic and nomenclatural changes so important in all areas of clinical microbiology The authors many of them new in this edition are all acknowledged experts in their fields and write with accuracy and authority on the latest and most significant discoveries in bacteriology mycology virology parasitology and susceptibility testing *Stealing the Game* Kareem Abdul-Jabbar, Raymond Obstfeld, 2015-02-03 From a Basketball Hall of Fame inductee and New York Times bestselling author this coming of age story follows Chris Richards after a basketball game goes wrong and leaves him searching for answers about his brother's strange behavior Chris Richards has always looked up to Jax his older brother and his parents' golden child Lately though Jax has been full of surprises First he dropped out of law school then he started hanging out with some shifty looking friends One day Jax asks Chris to recruit his best middle school teammates for a pickup basketball game in the park Chris doesn't think much of it until the wrong team wins and Jax goes ballistic It turns out that Jax bet on the game hoping to earn enough money to repay a debt to someone who doesn't forgive easily While Chris tries to walk a thin tightrope between helping his brother and staying out of trouble his friend Theo does some behind the scenes detective work to learn what Jax has been up to The day Chris is roped into a police investigation is the day he realizes he made the wrong play *A Step Along the Way* Stephen J. Pope, 2015-07-30 [Digest of District of Columbia Cases](#) William Sydenham Torbert, 1914 **From Craft to Profession** Mary N. Woods, 2023-04-28 This is the first in depth study of how the architectural profession emerged in early American history Mary Woods dispels the prevailing notion that the profession

developed under the leadership of men formally schooled in architecture as an art during the late nineteenth century. Instead, she cites several instances in the early 1800s of craftsmen builders who shifted their identity to that of professional architects. While struggling to survive as designers and supervisors of construction projects, these men organized professional societies and worked for architectural education, appropriate compensation, and accreditation. In such leading architectural practitioners as B. Henry Latrobe, Alexander J. Davis, H. H. Richardson, Louis Sullivan, and Stanford White, Woods sees collaborators, partners, merchandisers, educators, and lobbyists rather than inspired creators. She documents their contributions as well as those far less familiar of women architects and people of color in the profession's early days. Woods's extensive research yields a remarkable range of archival materials: correspondence among carpenters, 200-year-old lawsuits, architect-client spats, the organization of craft guilds, apprenticeships, university programs, and correspondence schools, and the structure of architectural practices, labor unions, and the building industry. In presenting a more accurate composite of the architectural profession's history, Woods lays a foundation for reclaiming the profession's past and recasting its future. Her study will appeal not only to architects but also to historians, sociologists, and readers with an interest in architecture's place in America today. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1999.
