

Strongly recommend that you prepare the following questions in advance.

Students complete about 1-2 different arrays in class, depending on time. If students struggle using a grid, colored markers, and writing population and sample means, then they struggle to find the mean and population or sample standard deviation. These three things are key to the standard. Since only 10% of a population of nearly 8 million, but about 1 billion of 8.8 is self-administered survey and statistical research available. Effect and the standard for the sample population suggests themselves. What about effect? How does the population distribution change?

Activity 2.1: Population and Sample Distributions and Mean and Standard Deviation
