Violence **Electric-Shock Weapons, Tasers and Policing** Abi Dymond, 2021-10-24 Building on five years of research and drawing on criminology science and technology studies STS socio legal studies and social psychology this book is the first non medical book written on electric shock weapons of which the best well known is the TASER brand The police s ability to use force is one of their most crucial powers yet one that has been relatively neglected by criminology This book challenges some of the myths surrounding the use of these weapons and considers their human rights implications and impact on members of the public and officers alike Drawing on STS it also considers the role and impact of electric shock technologies examines the extent to which technologies and non human agency may also play a role in shaping officer decision making and discretion and contributes to long standing debates about police accountability This is essential reading for policing scholars around the world particularly those engaged with use of force culture and accountability as well as those engaged with Science and Technology studies **The Right to Life Under International Law** Stuart

Casey-Maslen, Christof Heyns, 2021-09-23 Offers the first ever comprehensive treatment under international law of the foundational human right to life Essentials of Autopsy Practice Guy N. Ruttly, 2006-03-06 A practical hands on bench book covering difficult areas of autopsy for the modern pathologist Ruttly s book is unique chapters deal with issues never previously discussed and have been specifically selected to fill a gap in the market not just re hash old ideas Designed for consultants and trainees alike not only pathologists of all types but also non medics involved with the dead in any way lawyers police bereavement officers undertakers The first volume has become a reference aid to autopsy issues for all grades of lawyers Thus the audience that the book reaches is greater than a pure autopsy or forensic pathology textbook

Shooting to Kill Simon Bronitt, Miriam Gani, Saskia Hufnagel, 2012-11-05 The present book brings together perspectives from different disciplinary fields to examine the significant legal moral and political issues which arise in relation to the use of lethal force in both domestic and international law These issues have particular salience in the counter terrorism context following 9 11 which brought with it the spectre of shooting down hijacked airplanes and the use of force in Operation Kratos that led to the tragic shooting of Jean Charles de Menezes Concerns about the use of excessive force however are not confined to the terrorist situation The essays in this collection examine how the state sanctions the use of lethal force in

varied ways through the doctrines of public and private self defence and the development of legislation and case law that excuses or justifies the use of lethal force in the course of executing an arrest preventing crime or disorder or protecting private property An important theme is how the domestic and international legal orders intersect and continually influence one another While legal approaches to the use of lethal force share common features the context within which force is deployed varies greatly Key issues explored in this volume are the extent to which domestic and international law authorise pre emptive use of force and how necessity and reasonableness are legally constructed in this context Emergency Medical Services, 2 Volumes Jane H. Brice, Theodore R. Delbridge, J. Brent Myers, 2021-11-17 The two volume Emergency Medical Services Clinical Practice and Systems Oversight delivers a thorough foundation upon which to succeed as an EMS medical director and prepare for the NAEMSP National EMS Medical Directors Course and Practicum Focusing on EMS in the real world the book offers specific management tools that will be useful in the reader s own local EMS system and provides contextual understanding of how EMS functions within the broader emergency care system at a state local and national level The two volumes offer the core knowledge trainees will need to successfully complete their training and begin their career as EMS physicians regardless of the EMS systems in use in their areas A companion website rounds out the book s offerings with audio and video clips of EMS best practice in action Readers will also benefit from the inclusion of A thorough introduction to the history of EMS An exploration of EMS airway management including procedures and challenges as well as how to manage ventilation oxygenation and breathing in patients including cases of respiratory distress Practical discussions of medical problems including the challenges posed by the undifferentiated patient altered mental status cardiac arrest and dysrhythmias seizures stroke and allergic reactions An examination of EMS systems structure and leadership

Study of Deaths Following Electro Muscular Disruption David W. Hagy, 2009-09 Police leaders have sought alternatives to lethal force and better methods to subdue individuals to limit injuries and death In recent years electro muscular disruption technology also known as conducted energy devices CEDs have become the less lethal weapon of choice for many law enforcement agencies CED uses a high voltage low power charge of electricity to induce involuntary muscle contractions that cause temporary incapacitation However a significant number of individuals have died after exposure to a CED Some were normal healthy adults others were chemically dependent or had heart disease or mental illness This study addresses whether CEDs can contribute to or cause mortality and if so in what ways **Final Report** California.
