**Lars von Trier's Renewal of Film 1984-2014** Bodil Marie Stavning Thomsen,2017-06-01 Danish director Lars von Trier has produced more than 20 films since

his first appearance with *The Elements of Crime* in 1984. One of the most acknowledged and most controversial film directors of our time, Trier's films often escape the representational production of meaning. In *Lars von Trier's Renewal of Film 1984-2014*, Signal Pixel Diagram scholar Bodil Marie Stavnig Thomsen offers a comprehensive discussion of Lars von Trier's collected works. Examining Trier's experiments with narrative forms, genre, camera usage, light and colour tones, she shows how Trier's unique, ethically involving style activates the viewer's entire perception apparatus. In understanding this affective involvement, the author frames the discussion around concepts from Gilles Deleuze, Alois Riegl, Brian Massumi and others on the haptic image, the diagram, affect and the signaleptic material. *Eco-Freud: From A to Z*, Michael Marder, 2025-08-21. An unprecedented conceptual portrait of Freud as an ecological thinker, this book analyzes our current approaches to ecology and the environmental crisis through the lens of psychoanalysis. Conceived as a theoretical tool kit, the alphabetically arranged entries range from Geo-psychoanalysis to Trauma extensions and from Fetishism and the Climate to Obsessive Self-Blaming, guiding the reader toward a deeper appreciation of the unconscious forces at work in our green dreams and nightmares. Along the way, an intriguing image of psychic life emerges through a careful rereading of Freud's oeuvre, where the ego is eco, while minerals, animals and plants are all given their due for the shaping of human existence. *Sofia Coppola*, Hannah Strong, 2022-05-17. An illustrated critical survey of Academy Award-winning writer and director Sofia Coppola's career, covering everything from her groundbreaking music videos through her latest films. In the two decades since her first feature film was released, Sofia Coppola has created a tonally diverse, meticulously crafted and unapologetically hyperfeminine aesthetic across a wide range of multimedia work. Her films explore untenable relationships and the euphoria and heartbreak these entail, and Coppola develops these themes deftly and with discernment across her movies and music videos. From *The Virgin Suicides* and *Marie Antoinette* to *Lost in Translation* and *The Beguiled*, Coppola's award-nominated filmography is also unique in how its consistent visual aesthetic is informed by and in conversation with contemporary fine art and photography. Sofia Coppola offers a rich and intimate look at the overarching stylistic and thematic components of Coppola's work. In addition to critical essays about Coppola's filmography, the book will include interviews with some of her closest collaborators, including musician Jean-Benoît Dunckel and costume designer Nancy Steiner, along with a foreword by Italian filmmaker Alice Rohrwacher. It engages with her creative output while celebrating her talent as an imagemaker and storyteller. Along the way, readers meet again a cast of characters mired in the ennui of missed connections, loneliness, frustrated creativity, rebellious adolescence and the double-edged knife of celebrity, all captured by the emotional, intimate power of the female gaze. **Spectres of Pessimism**, Mark Schmitt, 2023-03-15. This book argues that philosophical pessimism can offer vital impulses for contemporary cultural studies. Pessimist thought offers ways to interrogate notions of temporality, progress and futurity. When the horizon of future expectation is increasingly shaped by the prospect of apocalypse and extinction, an exploration of pessimist thought can help to make sense of an increasingly complex and

uncertain world by affirming rather than suppressing the worst This book argues that a cultural logic of the worst is at work in a substantial section of contemporary philosophical thought and cultural representations Spectres of pessimism can be found in contemporary ecocritical thought antinatalist philosophies political thought and cultural theory as well as in literature film and popular music In its unsettling of temporality this new pessimism shares sensibilities with the field of hauntology Both deconstruct linear narratives of time that adhere to a stable sequence of past present and future Mark Schmitt therefore couples pessimism and hauntology to explore the spectres of pessimism in a range of theories and narratives from ecocriticism antinatalism and queer theory to utopianism from afropessimism to the fiction of Hari Kunzru and Thomas Ligotti to the films of Camille Griffin Gaspar Noé Denis Villeneuve and Lars von Trier *Sad Planets* Dominic Pettman, Eugene Thacker, 2024-03-28 Everything is sad wrote the Ancient poets But is this sadness merely a human experience projected onto the world or is there a gloom attributable to the world itself Could the universe be forever weeping the tears of things In this series of meditations Dominic Pettman and Eugene Thacker explore some of the key negative affects both eternal and emergent associated with climate change environmental destruction and cosmic solitude In so doing they unearth something so obvious that it has gone largely unnoticed the question of how we should feel about climate change Between the information gathered by planetary sensors and the simple act of breathing the air new unsettling moods are produced for which we currently lack an adequate language Should we feel grief over the loss of our planet Or is the strange feeling of witnessing mass extinction an indicator that the planet was never ours to begin with *Sad Planets* explores this relationship between our all too human melancholia and a more impersonal sorrow nestled in the heart of the cosmic elements Spanning a wide range of topics from the history of cosmology to the existential threat of climate change this book is a reckoning with the limits of human existence and comprehension As Pettman and Thacker observe never before have we known so much about the planet and the cosmos and yet never before have we felt so estranged from that same planet to say nothing of the stars beyond **Frames of Minds** Eelco F. M. Wijdicks, 2024 As a medium that aims to connect people through the communication and interpretation of experiences cinema is uniquely positioned to showcase cultural misunderstandings around issues of mental health *Frames of Minds* traces a history of psychiatry in film concentrating on the major paradigm shifts in neuropsychiatry over the last century Oftentimes representations of psychiatry mental illness and psychotic breakdown are reduced to tropes and used by filmmakers as a tool for plot progression Conversely films can be used as an avenue to voice common concerns about the missteps of psychiatry including overdiagnosis and mistreatment Dr Eelco Wijdicks provides fresh insights into the minds of filmmakers and how they creatively tackle this complex topic How do filmmakers use psychiatry and what do they want us to see What is their frame of mind psychoanalytically biologically sociologically anthropologically Were they influenced by their own prejudices about the origins of mental illness How does this influence the direction of their films Examining the history of film alongside developments in neuropsychiatry *Frames of*

Minds uncovers a cinematic language of psychiatry By taking chances to portray mental illness filmmakers aim to achieve a sense of reality and provide catharsis for viewers through the act of dramatization Ultimately the history of psychiatry in film is a history of the public perception of medicine and the ways psychiatry is understood by directors writers actors and audiences

**Audiovision zwischen Hand und Haut** Sonja Kirschall,2024-04-23 Welche Funktion hat der Tastsinn für die Sinnlichkeit von Film Filmtheoretische Konzeptualisierungen die diese Frage zu beantworten versuchen sind seit mehr als zwei Jahrzehnten maßgeblich von Gegenüberstellungen optischer und haptischer Bilder bestimmt Sonja Kirschall nimmt eine kritische Revision dieses Denkens vor indem sie es einerseits mit seiner eigenen etwa hundertjährigen Konzeptgeschichte andererseits mit den teletaktilen ästhetischen Praktiken der seit 2010 in den sozialen Medien produktiven ASMR Community konfrontiert Aus der Kombination von kritischer Theoriearbeit mit ästhetischer und Erfahrungsanalyse entwickelt sie so eine ordnende Zusammenschau möglicher Modi filmischer Tastsinnlichkeit und eine haptotaktile Art der Filmanalyse

*The Temptation of Non-Being* Artemy Magun,2024-05-02 Why do we enjoy artworks that depict disasters and suffering Is this a hangover from the Modernist impulse to break the rules of harmony Is there actually a proper way to perform negativity in art without resorting to nihilism The Temptation of Non Being uses these fundamental questions to paint a picture of contemporary art as beset by an outbreak of the negative and to construct a new theory of art as a medium of complex negativity The negative in art is explained not as a simple negation or destruction but as a multifaceted polymorphous structure with a vast range of strategies and techniques from parody and pastiche to defamiliarization and non resemblance Charting the depth of these negative practices Artemy Magun shows how they become progressively more complex and explicit illustrating them with interdisciplinary examples from Lars von Trier Jacek Malczewski Andrei Platonov and Fyodor Dostoyevsky At the heart of this layered nested structure lies an understanding of Modern aesthetics that helps to answer even more questions how can the testing probing nature of art lead to this preoccupation with the negative Why does this negativity emerge in the first place What can it tell us about art itself and how it functions in society This is an erudite and provocative analysis that enriches the ongoing evaluation of both high and low art
