Baldomero Coll-Perales,Miguel Sepulcre Ribes,Javier Gozalvez Sempere,2014-11-11 El presente libro ha sido dise ado para ayudar a los estudiantes del Grado en Ingenier a de Tecnolog as de Telecomunicaci n en el empleo de las herramientas utilizadas en las pr cticas de las asignaturas de comunicaciones m viles y para mostrarles c mo analizar y entender los resultados que se obtienen con dichas herramientas Para ello en primer lugar el libro describe de forma did ctica c mo utilizar las herramientas de medida profesionales empleadas en las pr cticas de comunicaciones m viles en la UMH Dichas herramientas se emplean habitualmente por ingenieros de planificaci n radio para monitorizar en tiempo real el rendimiento de las redes de comunicaciones m viles mediante drive tests Dicha descripci n incluye una presentaci n detallada de la herramienta de testeo profesional Nemo Handy desarrollada por Anite Dicha herramienta se incluye en un terminal celular en modo ingenier a empleado para monitorizar en tiempo real el funcionamiento y rendimiento de las redes celulares y tomar medidas para su posterior an lisis Dicho an lisis se realiza empleando la herramienta Nemo Outdoor descrita con detalle tambi n en el libro incluyendo ejemplos sobre c mo realizar los procesados m s relevantes Finalmente el libro incluye y analiza una serie de medidas se han realizado en un sistema celular UMTS HSDPA en activo en Elche En particular se explica el proceso seguido para realizar dichas medidas empleando Nemo Handy y se analizan mediante Nemo Outdoor las principales funcionalidades

de un sistema celular como el establecimiento y finalizaci n de llamadas la selecci n y re selecci n de celdas el traspaso y el an lisis de las descargas de datos y par metros radio This book has been designed to guide the students of the Bachelor s in Telecommunications Technology Engineering towards a clear understanding of how to use the laboratory tools and show them how to analyze and understand the collected measurements In this context the book first introduces and describes how to use the professional measurement tools employed in the laboratory activities of the mobile communications course at UMH These tools are commonly used by cellular radio engineers to monitor in real time the performance of cellular networks through drive tests The book first presents the Nemo Handy professional measurement testing tool developed by Anite This tool is included in an engineering mode cellular handset used to monitor in real time the operation of cellular networks and collect measurements for post processing Such processing is done using the Nemo Outdoor tool that is also introduced in the book including examples of how to perform the most relevant processing actions Finally this book shows how to conduct some measurement and analysis processes using Nemo Handy and Nemo Outdoor The measurements have been conducted over live UMTS and HSDPA networks in the city of Elche and cover the analysis of important cellular functionalities like establishment and release of a call cell selection and reselection handovers and analysis of data downloads and cellular parameters This chapter shows with practical examples how to conduct the measurements using Nemo Handy and how to interpret with Nemo Outdoor the exchanged cellular signaling messages in order to monitor the operation of cellular networks   MMS Daniel Ralph,Paul Graham,2004-04-21 MMS has evolved from the huge popularity of the SMS text service for GSM networks It is a departure from the transport mechanism used for SMS which is based on the GSM signalling channels to the use of IP to transport messages within the MMS network To this end MMS has similarities with Internet email and standard IETF protocols As with any new technology it is difficult to accurately predict the position within the next 5 years although based on previous experience with WAP and SMS it would be fair to say that these protocols will increase in usage over the next 5 years and become legacy for a further 5 years following which users will migrate onto the next wave of messaging Significant revenue growth and data usage is expected to be driven by consumer usage of MMS But MMS technology offers more than just a broadening of message content With MMS it is not only possible to send your multimedia messages from one phone to another but also from phone to email and vice versa This feature dramatically increases the possibilities of mobile communication both for private and corporate use Multimedia messaging will reshape the landscape of mobile communication making it more personal more versatile and more expressive than ever before MMS Is the first book to address how MMS and the use of IP to transport messages will affect existing infrastructure and business models Covers the fundamental changes to mail and billing systems Includes future recommendations such as interoperability and evolution Presents an overview of the MMS technology components Drawing on the authors hands on experience in the implementation of MMS technology developing billing and delivering services at BT this innovative book will appeal to
