New Boundaries in Political Science Fiction Donald M. Hassler, Clyde Wilcox, 2008 This book offers an interpretation of the evolution of a growing genre in literary film and television As a follow up to their 1997 collection Political Science Fiction Hassler and Wilcox have assembled twenty four noted international scholars representing diverse fields of inquiry to assess the influential voices and trends from the past decade in New Boundaries in Political Science Fiction The terrors and technologies that permeate our daily lives have changed radically in the past decade further highlighting the underlying speculations on our contested future that remain the core of this genre In surveying the vast expanse of politically charged science fiction of recent years the editors posit that the defining dilemma for these tales rests in whether identity and meaning germinate from progressive linear changes or progress or from a continuous return to primitive realities of war death and the competition for survival The discussion of political implications ranges among writers from H G Wells Robert A Heinlein Ursula Le Guin and Isaac Asimov to more radical recent voices such as Iain M Banks William Gibson Joanna Russ Philip K Dick and China Miéville While emphasizing the literature the collection also addresses political science fiction found on film and television from the original Star Trek through the newest incarnation of Battlestar Galactica

Here Be Dragons Stefan Ekman, Stefan Ekman, 2013-02-19 First in depth study of the use of landscape in fantasy literature Winner of the Mythopoeic Scholarship Award for Myth and Fantasy Studies 2016 Fantasy worlds are never mere backdrops They are an integral part of the work and refuse to remain separate from other

elements These worlds combine landscape with narrative logic by incorporating alternative rules about cause and effect or physical transformation They become actors in the drama interacting with the characters offering assistance or hindrance and making ethical demands In *Here Be Dragons* Stefan Ekman provides a wide ranging survey of the ubiquitous fantasy map as the point of departure for an in depth discussion of what such maps can tell us about what is important in the fictional worlds and the stories that take place there With particular focus on J R R Tolkien s *The Lord of the Rings* Ekman shows how fantasy settings deserve serious attention from both readers and critics Includes insightful readings of works by Steven Brust Garth Nix Robert Holdstock Terry Pratchett Charles de Lint China Mi ville Patricia McKillip Tim Powers Lisa Goldstein Steven R Donaldson Robert Jordan and Neil Gaiman and Charles Vess *Scar* China Mieville,2002-06 Aboard a vast seafaring vessel prisoners and slaves are being transported to a fledgling colony of New Crobuzon When the ship is besieged by pirates the senior officials are executed and surviving passengers are brought to a floating city constructed upon the hulls of pirated ships a place whose leaders harbor a sinister agenda

Art and Idea in the Novels of China Miéville Carl Freedman,2015-09-07 This book offers in the first six chapters critical readings of six novels by China Mi ville which are followed in the seventh chapter by a theoretical meditation on some of the conceptual issues raised by and engaged in the Mi ville oeuvre There comes a moment in *The City* the City though it is not necessarily the same moment for every reader when you realise that Beszel and Ul Qoma are not separate realms but the same space divided Likewise art and idea are often subject to absurd partition but then along comes an author such as China Mi ville who shows them to be in truth indissoluble So argues Freedman s inordinately readable and just as rigorous account of Mi ville s major novels Highly recommended Mark Bould University of the West of England Freedman offers a compelling interpretation of Mi ville s novels informed equally by an impressive range of literary influences and a carefully documented exploration of historical antecedents Seeing Mi ville s genre hybridity as an illustration of the power of dialectical thinking Freedman illuminates the complex utopian project of Mi ville s fiction Freedman is one of our finest critical voices on Mi ville one of the most important speculative writers of the 21st century Sherryl Vint University of California Riverside

Neo-Victorianism and the Memory of Empire Elizabeth Ho,2012-04-19 Examining the global dimensions of Neo Victorianism this book explores how the appropriation of Victorian images in contemporary literature and culture has emerged as a critical response to the crises of decolonization and Imperial collapse *Neo Victorianism and the Memory of Empire* explores the phenomenon by reading a range of popular and literary Anglophone neo Victorian texts including Alan Moore s *Graphic Novel From Hell* works by Peter Carey and Margaret Atwood the films of Jackie Chan and contemporary Steampunk science fiction Through these readings Elizabeth Ho explores how constructions of popular memory and fictionalisations of the past reflect political and psychological engagements with our contemporary post Imperial circumstances

The Hawthorne Archive Avery F. Gordon,2017-10-31 The Hawthorne Archive named after the richly fabled tree has long welcomed the participants in the

various Euro American social struggles against slavery racial capitalism imperialism and authoritarian forms of order The Archive is not a library or a research collection in the conventional sense but rather a disorganized and fugitive space for the development of a political consciousness of being indifferent to the deadly forms of power that characterize our society Housed by the Archive are autonomous radicals runaways abolitionists commoners and dreamers who no longer live as obedient or merely resistant subjects In this innovative genre and format bending publication Avery F Gordon the keeper of the Archive presents a selection of its documents original and compelling essays letters cultural analyses images photographs conversations friendship exchanges and collaborations with various artists Gordon creatively uses the imaginary of the Archive to explore the utopian elements found in a variety of resistive and defiant activity in the past and in the present zeroing in on Marxist critical theory and the black radical tradition Fusing critical theory with creative writing in a historical context The Hawthorn Archive represents voices from the utopian margins where fact fiction theory and image converge Reminiscent of the later fictions of Italo Calvino or Walter Benjamin s Arcades Project The Hawthorn Archive is a groundbreaking work that defies strict disciplinary methodological and aesthetic boundaries And like Ghostly Matters Haunting and the Sociological Imagination which established Gordon as one of the most influential interdisciplinary scholars of the humanities and social sciences in recent years it provides a kaleidoscopic analysis of power and effect The Hawthorn Archive s experimental format and inventive synthesis of critical theory and creative writing make way for a powerful reconception of what counts as social change and political action offering creative inspiration and critical tools to artists activists scholars across various disciplines and general readers alike

China Miéville Tony Venezia, Sherryl Vint, Raphael Zähringer, Dougal McNeill, Joe Sutliff Sanders, Paul March-Russell, Ben De Bruyn, Matthew Sangster, Anthony F. Lang, Jr., Mark P. Williams, Roger Luckhurst, 2015-12-01 The chapters in this collection respond to the range of interests that have shaped Miéville s fiction from his influential role in contemporary genre debates to his ability to pose serious philosophical questions about state control revolutionary struggle regimes of apartheid and the function of international law in a globalized world This collection demonstrates how Miéville s fictions offer a striking example of contemporary literature s ability to imagine alternatives to neoliberal capitalism at a time of crisis for leftist ideas within the political realm

Fiction Glossary completes this indispensable Handbook

Alterity and Capitalism in Speculative Fiction Tomás Vergara, 2023-10-04 Speculative fiction has been traditionally studied in Marxist literary criticism following Darko Suvin's paradigmatic model of science fiction according to a hierarchical division of its multiple subgenres in terms of their assumed inherent political value. By drawing on an alternative genealogy of Marxist criticism, this book presents a non-hierarchical understanding of the estrangement connecting all varieties of speculative fiction, outlining the political potential shared across the spectrum of speculative fiction along with the specific narrative strategies by which it critically engages with its historical context of production. This study's main point of contention is that speculative fiction performs an estrangement effect on historical reality that can potentially render visible the role of fantasies in the organisation of capitalist social practice. This narrative effect enables an estranged perspective by which the novel interprets and conceptualises historical reality in a totalising manner.

Rhetorics of Fantasy Farah Mendlesohn, 2014-01-01 This sweeping study of fantasy literature offers new and often surprising readings of works both familiar and obscure. A fine critical work. *Journal of the Fantastic in the Arts*. Transcending arguments over the definition of fantasy literature, *Rhetorics of Fantasy* introduces a provocative new system of classification for the genre. Drawing on nearly two hundred examples of modern fantasy, author Farah Mendlesohn identifies four categories: portal, quest, immersive intrusion, and liminal, that arise out of the relationship of the protagonist to the fantasy world. Using these sets, Mendlesohn argues that the author's stylistic decisions are then shaped by the inescapably political demands of the category in which they choose to write. Each chapter covers at least twenty books in detail, ranging from nineteenth-century fantasy and horror to some of the best works in the contemporary field. Mendlesohn discusses works by more than one hundred authors, including Lloyd Alexander, Peter Beagle, Marion Zimmer Bradley, John Crowley, Stephen R. Donaldson, Stephen King, C. S. Lewis, Gregory Maguire, Robin McKinley, China Miéville, Suniti Namjoshi, Philip Pullman, J. K. Rowling, Sheri S. Tepper, J. R. R. Tolkien, Tad Williams, and many others.

BENNY THE ANTICHRIST and other stories Scott Ellis, 2022-08-10 *BENNY THE ANTICHRIST and other stories*. The first ever collection of stories and vignettes from noted science fiction and fantasy storyteller Scott Ellis, including *Benny the Antichrist*. He's the arch villain, the most made guy in this universe or any other. And he's looking to make a career change. *The Reason of Sleep*. How do you make your way in a world ruled by those who never sleep and those who live in dreams? *Fae Dar*. There's this bar, see, full of gods, trolls, pixies, and every other being out of myth and legend. And in walks an accountant. In the Shaft, two guys getting high and playing basketball in a skyscraper elevator shaft: what could go wrong? *Saccade*. He has no illusions. That's his problem. *Magic Phone*. A lyrical conversation about guns, long distance, and neutrinos. *The Deep Crew*, who handles the psychic garbage of an entire city. A special kind of sanitation worker.

A Critic at Large in the Multiverse , A Short History of Fantasy Farah Mendlesohn, Edward James, 2012-06-27 Some of the earliest books ever written, including *The Epic of Gilgamesh* and *the Odyssey*, deal with monsters, marvels, extraordinary voyages, and magic, and this genre known as fantasy.

remained an essential part of European literature through the rise of the modern realist novel Tracing the history of fantasy from the earliest years through to the origins of modern fantasy in the 20th century this account discusses contributions decade by decade from Tolkien's Lord of the Rings trilogy and Lewis's Narnia books in the 1950s to J K Rowling's Harry Potter series It also discusses and explains fantasy's continuing and growing popularity

Extraterritorial Matthew Hart, 2020-08-25 The future of fiction is neither global nor national Instead Matthew Hart argues it is trending extraterritorial Extraterritorial spaces fall outside of national borders but enhance state power They cut across geography and history but do not point the way to a borderless new world They range from the United Nations headquarters and international waters to CIA black sites and the departure zones at international airports The political geography of the present Hart shows has come to resemble a patchwork of such spaces Hart reveals extraterritoriality's centrality to twenty first century art and fiction He shows how extraterritorial fictions expose the way states construct global space in their own interests Extraterritorial novels teach us not to mistake cracks or gradations in political geography for a crisis of the state Hart demonstrates how the unstable character of many twenty first century aesthetic forms can be traced to the increasingly extraterritorial nature of contemporary political geography Discussing writers such as Margaret Atwood J G Ballard Amitav Ghosh Chang rae Lee Hilary Mantel and China Mi ville as well as artists like Hito Steyerl and Mark Wallinger Hart combines lively critical readings of contemporary novels with historical and theoretical discussions about sovereignty globalization cosmopolitanism and postcolonialism Extraterritorial presents a new theory of literature that explains what happens when dreams of an open connected world confront the reality of mobile elastic and tenacious borders

Imagining Urban Futures Carl Abbott, 2016-09-13 What science fiction can teach us about urban planning Carl Abbott who has taught urban studies and urban planning in five decades brings together urban studies and literary studies to examine how fictional cities in work by authors as different as E M Forster Isaac Asimov Kim Stanley Robinson and China Mi ville might help us to envision an urban future that is viable and resilient Imagining Urban Futures is a remarkable treatise on what is best and strongest in urban theory and practice today as refracted and intensely imagined in science fiction As the human population grows we can envision an increasingly urban society Shifting weather patterns rising sea levels reduced access to resources and a host of other issues will radically impact urban environments while technology holds out the dream of cities beyond Earth Abbott delivers a compelling critical discussion of science fiction cities found in literary works television programs and films of many eras from Metropolis to Blade Runner and Soylent Green to The Hunger Games among many others

Future Cities Paul Dobraszczyk, 2025-03-15 Brings together architecture fiction film and visual art to reconnect the imaginary city with the real proposing a future for humanity that is firmly grounded in the present and the diverse creative practices already at our fingertips Though reaching ever further toward the skies today's cities are overshadowed by multiple threats climate change overpopulation social division and urban warfare all endanger our metropolitan way of life The fundamental tool we use to

make sense of these uncertain city futures is the imagination Architects artists filmmakers and fiction writers have long been inspired to imagine cities of the future but their speculative visions tend to be seen very differently from scientific predictions flights of fancy on the one hand versus practical reasoning on the other In a digital age when the real and the fantastic coexist as near equals it is especially important to know how these two forces are entangled and how together they may help us best conceive of cities yet to come Exploring a breathtaking range of imagined cities submerged floating flying vertical underground ruined and salvaged Future Cities teases out the links between speculation and reality arguing that there is no clear separation between the two In the Netherlands prototype floating cities are already being built Dubai s recent skyscrapers resemble those of science fiction cities of the past while makeshift settlements built by the urban poor in the developing world are already like the dystopian cities of cyberpunk
