Yellowstones Survival Susan G. Clark,2021-05-15 This book focuses on Yellowstone the park the larger ecosystem and even more so the idea of Yellowstone In presenting a case for a new conservation paradigm for the Greater

Yellowstone Ecosystem GYE including Yellowstone National Park the book at its heart is about people and nature relationships This new paradigm will be truly committed to a healthy sustainable environment rich in other life forms and one that affords dignity for all humans and nonhumans The new story or paradigm must be about living such a commitment and future for GYE in real time The book presents a well developed theory for interdisciplinary problem solving that is grounded in practice

Metamodern Leadership James Surwillo, 2017-07-11 Metamodern Leadership outlines the seven values that identify the character of our future leaders based on the circumstances that make the Millennial Generation who they are It is at once an attempt to implore youth to seize their potential by tying their values to ancient wisdom as well as a warning to everyone else to understand the impacts of disregarding the inevitable tendencies of a very distinct new demographic This is the untold story of the personal responsibility required of the Millennial Generation against the messaging and memes that portray them as entitled and lazy It is an optimistic and pragmatic interpretation on the leadership mandates in the near future The ancient virtue of leadership required broad knowledge as the basis for critical thinking and self examination The late twentieth century required myopic versions of leadership which neglected the truths of centuries of wisdom Our younger generations will lead and follow based on new foundations that seem counterintuitive to most yet will be the status quo within a decade This distinction will lead to pragmatism and problem solving for the future rather than the dogma and gridlock of today We will require a generation of leaders who can once again link the complexities of the future with the ancient wisdom of progress

The Realities of 'Reality' - Part II: Making Sense of Why Modern Science Advances (Volume 2 of 2) Fritz Dufour, MBA, DESS, 2019-03-23 The difference between Part I and Part II Volumes 1 2 of this series is that in Part I the author showed how what we call reality starts with the inner self whereas Part II describes what in fact impacts and modifies the environment or reality and what are the factors behind that dynamics What impacts and modifies the environment is science This Volume 2 starts by showing how technology plays an important role in scientific progress Although the relationship between the two is symbiotic science can exist without technology but technology desperately needs science Military technology is an example of how technology can help science advance Some military inventions end up having civilian use Science being at the center of society the book makes the case for the direct impact of such social sciences as politics and economics on the advancement of science Politics says the author influences science because of uncertainty in science and economics does it thanks to the availability of money to scholars and scientists for their research On the other hand government also influences scientific progress through regulations The book gives cyberspace regulation as an example Furthermore by showing how art influences science the author really argues for the polyfactorial aspect of scientific progress In that line of thought he goes on to also prove that factors such as skepticism curiosity and the quest for knowledge greatly influence the advancement of science That says the author is a ninety degree turn By ending Part two that way I wanted to somehow link it to Part I which argues that reality starts from within
