Voelker, Scott Shenker, 2005-01-12 On February 26-27 2004 the 3rd International Workshop on Peer to Peer Systems IPTPS 2004 brought researchers and practitioners together to discuss the latest developments in peer to peer technologies applications and systems. As the third workshop in the series IPTPS 2004 continued the success of the previous workshops in pioneering the state of the art in peer to peer systems and identifying key research challenges in the area. The workshop received 145 submissions in the form of 6 page position papers. As with previous workshops submissions went through two rounds of reviews by an international program committee of 14 experts from industry and academia. In the first round each submission received two reviews. In the second round we focused our attention on submissions with either positive reviews or with reviews that expressed substantially different opinions. In addition to the technical merit the reviewing process emphasized originality and the potential of the submission to lead to interesting discussions during the workshop. In the end the program committee selected a workshop program of 27 papers covering a wider range of topics including new peer to peer applications advances in routing load balancing searching as well as transport mobility and other networking topics. Authors revised accepted position papers to six pages for the workshop program and made a final round of revision for this volume. The workshop was composed of eight sessions that spanned two days. To focus discussions attendance was limited to

67 participants and included a substantial time for interaction and discussion between sessions and at social events
