social scientists focuses on the link between body and memory that specifically refers to the use of digital technologies. Neuroscientists know very well that human beings automatically and unconsciously organize their experience in their bodies into spatial units whose confines are established by changes in location temporality and the interactive elements that determine it. Our memories might be less reliable than those of the average computer but they are just as capacious, much more flexible and even more user friendly. The aim of the present book is to outline by the body what we know of the sociology of memory. The authors and editors believe that an analysis at the sociological level will prove valuable in throwing light on accounts of human behavior at the interpersonal and social level and will play an important role in our capacity to understand the neurobiological factors that underpin the various types of memory. This book is an ideal resource for advanced and postgraduate students in social sciences as well as practitioners in the field of Information and Communication technologies. Scholarly and accessible in tone. Learning from Memory: Body, Memory and Technology in a Globalizing World will be read and enjoyed by members of the general public and the professional audience alike.

GO WITH YOUR HEART NOT THE MIND DUANE THE GREAT WRITER, 2012-08-20 When a person goes with their Heart they are taking the risk into discovering their own Being. Of course all most all of us go through some type of schooling which makes sense for the society in which we live but if we never take the risk to discover our Heart and Being then we continue on for many more unconscious lifetimes until we are ready to WakeUp. But we definitely need RealGuidance to discover who we are and why we are here more so than what can be found in any of the Literal Institutions. Young children live with their Heart and not their head or mind as they have not been overly conditioned. Nature and all the creatures in it are the same way as they are Being with Life and not working against it or trying to destroy it. Of course none of us can destroy Life but we can create things that distort what Life has provided for us on the Earth. The Reality Life IS is all about Becoming MoreAware from the Heart.
