Marshall,2012-12-06 The papers contained herein were presented at the Fourth International Conference on Composite Structures ICCS 4 held at Paisley College of Technology Scotland in July 1987 The Conference was organised and sponsored by Paisley College of Technology It was co sponsored by the Scottish Development Agency the National Engineering Laboratory the US Air Force European Office of Aerospace Research and Development and the US Army Research Development and Standardisation Group UK It forms a natural and ongoing progression from the highly successful First Second and Third International Conferences on Composite Structures ICCS 1 ICCS 2 and ICCS 3 held at Paisley in 1981 1983 and 1985 respectively There is little doubt that composite materials are rightfully claiming a prominent role in structural engineering in the widest sense Moreover the range and variety of useful composites has expanded to a level inconceivable a decade ago However it is also true that this increasing utilisation has generated an enhanced awareness of the manifold factors which dictate the integrity of composite structures This is indeed a healthy attitude to a relatively new dimension in structural engineering which will have an increasingly dominant role as the century progresses Both the diversity of application of composites in structural engineering and the endeavours which will ensure their fitness for purpose are reflected herein **Books and Pamphlets, Including Serials and Contributions to Periodicals** Library of Congress.
