Globalization and high speed communication put twenty first century people in contact with adherents to a wide variety of world religions but usually valuable knowledge of these other traditions is limited at best On the one hand religious stereotypes abound hampering a serious exploration of unfamiliar philosophies and practices On the other hand the popular idea that all religions lead to the same God or the same moral life fails to account for the distinctive origins and radically different teachings found across the world s many religions Understanding World Religions presents religion as a complex and intriguing matrix of history philosophy culture beliefs and practices Hexham believes that a certain degree of objectivity and critique is inherent in the study of religion and he guides readers in responsible ways of carrying this out Of particular importance is Hexham s decision to explore African religions which have frequently been absent from major religion texts He surveys these in addition to varieties of Hinduism Buddhism Judaism Christianity and Islam **In Search of Origins** Garry Trompf,2005-01-01 Religion is an integral part of our life The answer to the question what is religion is subjective Since the word religion and its cognates are common coinage across the literate world most of us will have a fair appreciation of the term s connotations Considering students and scholars alike are lacking an introductory textbook on the origins of religion in modern Western theory and archaeological practice this work is designed to fill the lacuna Historians of ideas and social science are often not clear as to how any given theory of religion might pertain to the known archaeological record while exponents of prehistoric religion have worked with surprisingly narrow definitions of religious life Many will locate the kernel of the matter in practice or in an active spirituality Today the pressures of the global village have forced many of us to take off our blinkers and do some cross cultural homework Religious Studies has emerged as an academic discipline or intellectual pursuit with one of its functions being to facilitate mutual understanding between traditions and to ensure that the varieties of religious belief and experience are fairly appraised The series of which this book is a part will be historically rather than theologically oriented This book will cover such a vast area for investigation and it is designed to help students find their own way through the forest pick the trees which interest them and learn how to scrutinise them in depth Religious Studies is a multi disciplinary activity and one is encouraged to turn over as many stones as possible to look at religions from as many different angles as possible the psychological anthropological sociological geographical ecological political economic and the like with some awareness of current theological debates as well This book gives scope to the comparative method

and all the great religions are treated side by side with points of comparison and contrast drawn. This book begins with the large question of the origins and prehistory of religion including the bearing anthropological study has on this question before giving space to the larger traditions themselves. The comparative method is applied not only between such enormous aggregates of phenomena as let us say Buddhism and Islam but between these and small scale tribal traditions as well. The book highlights that some religions will be difficult to separate from cultures because they amount to a total way of life. An attempt is made to try to interpret religion both as culture and as a distinctive set of forces in interaction with culture or perhaps even against prevailing cultural forms. This book has been designed to help students find for themselves possible answers to existential or theological questions but only as a side effect to historical and phenomenological study and as the author says provide no such answers on a platter.

Mysticism and the Spiritual Quest Phyllis Zagano, 2013. A crosscultural exploration of the meanings, definitions, practices and common themes of mysticism via a study of original texts in translation from different parts of the world. It brings together the writings of the mystics from Christianity, Judaism, Islam, Buddhism, Hinduism, Taoism and Confucianism in one volume.

Representing Religion Tim Murphy, 2014-12-05. If religion is continually in a state of flux, how can the study of religion critically examine contemporary religious beliefs and values? **Representing Religion** critically examines this crisis of representation. The volume traces the history of religious studies, critiquing the concept that experience is central to understanding religion. The views of influential semioticians and philosophers notably Nietzsche, Saussure, Foucault, Barthes and Bakhtin are used to construct a new methodology for the critical study of religion. **Representing Religion** will be of interest to students and scholars of semiotics as well as theory and method in religious studies.

Psychology, Religion, and Spirituality James M. Nelson, 2009-02-17. Over a century ago psychologists who were fascinated with religion began to study and write about it. Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental understandings about the human person and our place in the world. This book provides an introduction to the important conversations that have developed out of these interchanges. The dialogue between psychology and religion is difficult to study for a number of reasons. First it requires knowledge of both psychology and religion. People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology. Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion. These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical background. Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds. This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult.
