In contrast to the other senses smell has long been thought of as too elusive too fleeting for traditional historical study Holly Dugan disagrees arguing that there are rich accounts documenting how men and women produced consumed and represented perfumes and their ephemeral effects She delves deeply into the cultural archive of olfaction to explore what a sense of smell reveals about everyday life in early modern England In this book Dugan focuses on six important scents incense rose sassafras rosemary ambergris and jasmine She links these smells to the unique spaces they inhabited churches courts contact zones plague ridden households luxury markets and pleasure gardens and the objects used to dispense them This original approach provides a rare opportunity to study how early modern men and women negotiated the environment in their everyday lives and the importance of smell to their daily actions Dugan defines perfume broadly to include spices flowers herbs animal parts trees resins and other ingredients used to produce artificial scents smokes fumes airs balms powders and liquids In researching these Renaissance aromas Dugan uncovers the extraordinary ways now largely lost that people at the time spoke and wrote about smell objects ambered civited expired fetored halited resented and smeeked or were described as breathful embathed endulced gracious halited incensial odorant pulvil redolent and suffite A unique contribution to early modern studies *The Ephemeral History of Perfume* is an unparalleled study of olfaction in the Renaissance a period in which new scents and important cultural theories about smell were developed Dugan's inspired analysis of a wide range of underexplored sources makes available to scholars a remarkable wealth of information on the topic **The Scent of Jasmine** Lioness

Flowers Young Tan,1991 **Chambers's Encyclopædia: Num.-Pue**,1880 *Cultivation and Utilization of Aromatic Plants* H. Panda,2005-10-05 Aroma has played a vital role directly as well as indirectly in the life of human beings since its appearance on the earth as a result of evolution India Egypt and Persia were amongst the first countries to have conceived the process of distillation of essential oils Aromatic plants have essential or aromatic oils naturally occurring in them They help heal mental ailments and other diseases India is endowed with a rich wealth of medicinal plants Aromatic Aroma Producing plants are those plants which produce a certain type of aroma Their

aroma is due to the presence of some kind of essential oil with chemical constituents that contain at least one benzene ring in their chemical configuration. These plants have made a good contribution to the development of ancient Indian material medica. In recent years there has been a tremendous growth of interest in plant based drugs, pharmaceuticals, perfumery products, cosmetics, and aroma compounds used in food flavors and fragrances and natural colors in the world. The chemical nature of these aromatic substances may be due to a variety of complex chemical compounds. There is a definite trend to adopt plant based products due to the cumulative derogatory effects resulting from the use of antibiotic and synthetics and except for a few cultivated crops the availability of plant based material is mainly from the natural sources like forests and wastelands. There is a need to introduce these crops into the cropping system of the country which besides meeting the demands of the industry will also help to maintain the standards on quality, potency and chemical composition. During the past decade demand for aromatic plants and its products has attracted the worldwide interest. India being the treasure house of biodiversity accounts for thousands of species which are used in herbal drugs. 90% of herbal industry requirement of raw material is taken out from the forests. This book basically deals with cultivation of *matricaria chamomilla*, present agro production technology, status of celery, cultivation of *ocimum gratissimum* Linn var *clocimum*, the production and perfume potential of *jasminum*, collections, chemical modification of turmeric oil to more value added products, biologically active compounds from turpentine oil, folk medicinal uses of indigenous aromatic plants in Nepal, traditional uses of selected aromatic plants of Bhutan and their cultivation prospects, blending aspects of perfumes with turpentine constituents, the chemistry of mint flavour, essential oils of *cinnamomum* species, citral containing *cymbopogon* species etc. The aim of publishing this book is to provide multidisciplinary information on aromatic plants. The book covers method of cultivation and utilization of various aromatic plants. This is a very useful book for farmers, technocrats, agriculture universities, libraries, new entrepreneurs etc.
