*How Inventions Really Happen* Paul C. Wilson, 2017-02-17 Inventor Innovator Entrepreneur These are today's heroes Public policies are designed to help them Investors want to fund them Successful ones make hundreds of millions even billions of dollars Whole nations pin their hopes on these people to stimulate their economies solve their problems give them prestige on the world stage But who are they What special gifts do they have And what exactly is it that they do That is what this book is about The story of the sewing machine an invention that dramatically transformed the lives of women shows that it was brought into existence by individuals with very different aims and talents Who deserves the credit Was it the man who built a test device that made a stitch but then gave it away or lost it Or another who built a machine that barely worked but got a patent on it Then there was a man who developed it into something useful and made millions from it Or was the true inventor someone who built an innocuous device to move cloth between stitches which turned out to be the one feature no sewing machine could do without Or was he the man who made a simple machine that anyone could afford Each of these fascinating characters contributed something essential If we look closely at what they did and what they were like we'll understand how inventions really happen
