

CHARTER SCHOOLS VS PRIVATE SCHOOLS

CHARTER SCHOOLS

Charter schools are publicly funded schools that operate independently. They have more flexibility in curriculum and management compared to traditional public schools but are still held accountable for meeting specific performance goals outlined in their charter. Charter schools are open to all students, typically through a lottery system, and do not charge tuition fees.

PRIVATE SCHOOLS

Private schools are educational institutions that are privately funded and operated. They are not run by the government and often have a selective admission process based on criteria such as academic performance, religious affiliation, or special interests. Private schools have the autonomy to establish their own curriculum and educational approach and charge tuition fees to cover their expenses.

Discrimination in an Unequal World Miguel Angel Centeno, Katherine S. Newman, 2010-09 Is globalization making our world more equal or less Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination Tackling this challenge *Discrimination in an Unequal World* explores the relationship between discrimination and unequal outcomes in the appropriate geographical and historical context Noting how each society tends to see its particular version of discrimination as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices However since methods differ and are often designed for particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates social hierarchies the democratization of inequality and the disappearance of traditional categories *Knowledge Beyond Colour Lines* Monwabisi K. Ralarala, Salochana Lorraine Hassan, Rajani Naidoo, 2021-05-25 Knowledge remains timely in education The need for academics to contemplate its relevance worth use and everything in between deems a continuous intellectual project rather than a conundrum to be solved This book takes the South African context by the horns as it challenges the often dormant and traditionalist ways in which higher education spaces see knowledge Through original research and the voices of academics and students this book argues for repurposing knowledge generation knowledge sharing and critical pedagogy so that more inclusive teaching and learning environments can be both imagined and sustained The contentious tensions that this creates for LoLT and SoTL in particular are unlocked so as to trouble the South African higher education landscape with the intent to proffer alternative pathways for a knowledge beyond colour lines Prof Shan Simmonds PhD NWU This edited volume bristles with fresh scholarly approaches and insights of an emergent generation of engaged scholars grappling with the issues and problems of higher education in South Africa The issues dealt with here are varied and encompassing They are treated with intellectual delicacy and probing sensitivity articulating informed data and bold conclusions They serve well Prof Kwesi Kwaa Prah Emeritus Professor of Sociology University of the Western Cape Founder of the Centre for Advanced Studies of African Society *Contextualised Critical Reflections on Academic Development Practices* Teboho Pitso, 2021-04-20 This book offers

Discerning Critical Hope in Educational Practices

Vivienne Bozalek, Brenda Leibowitz, Ronelle Carolissen, Megan Boler, 2013-12-04 How can discerning critical hope enable us to develop innovative forms of teaching learning and social practices that begin to address issues of marginalization privilege and access across different contexts At this millennial point in history questions of cynicism despair and hope arise at every turn especially within areas of research into social justice and the struggle for transformation in education While a sense of fatalism and despair is easily recognizable establishing compelling bases for hope is more difficult This book addresses the absence of sustained analyses of hope that simultaneously recognize the hard edges of why we despair The volume posits the notion of critical hope not only as conceptual and theoretical but also as an action oriented response to despair Our notion of critical hope is used in two ways it is used firstly as a unitary concept which cannot be disaggregated into either hopefulness or criticality and secondly as an analytical concept where critical hope is engaged and diversely theorized in ways that recognize aspects of individual and collective directions of critical hope The book is divided into four sub sections Critical Hope in Education Critical Hope and a Critique of Neoliberalism Critical Race Theory Postcolonial Perspectives on Critical Hope Philosophical Overviews of Critical Hope Education can be a purveyor of critical hope but it also requires critical hope so that it as a sector itself can be transformative With contributions from international experts in the field the book will be of value to all academics and practitioners working in the field of education
