Meese-Rogoff Puzzle I. Moosa, K. Burns, 2014-12-17 For the past 30 years international monetary economists have believed that exchange rate models cannot outperform the random walk in out of sample forecasting as a result of the 1983 paper written by Richard Meese and Kenneth Rogoff Marking the culmination of their extensive research into the Meese Rogoff puzzle Moosa and Burns challenge the orthodoxy by demonstrating that the naive random walk model can be outperformed by exchange rate models when forecasting accuracy is measured by metrics that do not rely exclusively on the magnitude of forecasting error The authors present compelling evidence supported by their own measure the adjusted root mean square error to finally solve the Meese Rogoff puzzle and provide a new alternative Demystifying the Meese Rogoff Puzzle will appeal to academics with an interest in exchange rate economics and international monetary economics It will also be a useful resource for central banks and financial institutions *Places of Memory* K. dynamics to promote an alternative funding model based on a profitable and long lasting connection between the audiovisual and financial markets The valuation model both for products and firms proposed in this book are at the basis of this new approach Contingent Faculty Publishing in Community: Case Studies for Successful Collaborations L. Guglielmo, L. Gaillet, 2014-12-23 Contributors argue that the key to innovative teaching and scholarship lies in institutional support for the contingent labor force and they encourage contingent faculty to organize self mentoring groups create venues for learning disseminating their experiences and findings and connect scholarship to service and teaching in novel ways **Event of Signature** Michaela Fiserova, 2022-08-01 Event of Signature formulates a new philosophical problem which focuses on the handwritten signature as sign of legal identification Author Michaela Fiserova works with three metaphysical expectations which are shared in discourses of graphology and forensic analysis The first expectation tends to reveal the signer's soul a handwritten signature naturally mirrors the unique psychological qualities of the signer The second expectation tends to guarantee the originality of the signer's trace a handwritten signature proves physical contact between the signed document and the writing tool authentically moved by the signer's hand The third expectation tends to recognize the signer's legal identity a handwritten signature is expected to reproduce the signer's personal style which enables identification by legal authorities In a methodologically inventive and semiotically based dialogue with Derrida's deconstruction Fiserova situates this triple expectation in the interval between life and law Challenging coverage of this topic finally shows that none of the metaphysical expectations will ever be fulfilled in the event of manual signing Legal uses of handwritten signature are characterized by the complex aporia of repeating the unrepeatable *Jean Baudrillard: The Disappearance of Culture* Richard G.
