Private food law Bernd van der Meulen, 2023-09-04

Since the turn of the Millennium world wide initiatives from the private sector have turned the regulatory environment for food businesses upside down For the first time in legal literature this book analyses private law initiatives relating to the food chain often referred to as private voluntary standards or schemes Private standards are used to remedy flaws in legislation in order to reach higher levels of consumer protection than the ones chosen by the EU legislature and to manage risks and liability beyond the traditional limits of food businesses We see that litigation is no longer solely framed by legislative requirements but ever more by private standards such as GlobalGAP BRC IFS SQF and ISO These private standards incorporate public law requirements thus embedding them in contractual relations and exporting them beyond the jurisdiction of public legislators Other standards focus on corporate social responsibility or sustainability This book also addresses how private religious standards such as Kosher and Halal play a role in defining specific markets of growing importance It is noted that organic standards have found an interesting symbiosis with public law Another development on this topic is that food businesses are inspected more often by private auditors than by public inspectors Effects in terms of receiving or being denied certification far outweigh public law sanctions In short private law has changed an entire legal infrastructure for the food sector It emerges as competing with the public law regulatory infrastructure This book is of interest to all who concern themselves with food law legislation and litigation and the evolving role of private standards on changing the landscape of food chains and innovation **Smallholders, Householders** Robert McC. Netting, 1993 Contrasting the prevailing theories of the evolution

of agriculture the author argues that the practice of smallholding is more efficient and less environmentally degrading than that of industrial agriculture which depends heavily on fossil fuel chemical fertilizers pesticides and herbicides He presents a convincing case for his argument with examples taken from Africa Asia Europe and the Americas and demonstrates that there are fundamental commonalities among smallholder cultures Smallholders Householders is a detailed and innovative analysis of the agricultural efficiency and conservation of resources practiced around the world by smallholders

Nchanji, Ofundem Tataw, Raymond N. Nkongho, Patrice Levang, This study was carried out in three major palm oil producing areas in Cameroon with the aim of investigating the artisanal milling and commercialization of red palm oil Structured and semi structured questionnaires were administered focus group discussions and participatory observation were applied to obtain required information Those involved were identified and the service providers ranged from mill

owners or managers to smallholders and intermediaries some of which were involved in two or three of the services All told 83% of those involved were men and the women represented 17% of the service providers Six different types of processing equipment were identified in the production areas and it was revealed that semi automated press and combined motorized hydraulic digester and press system digester screw press were the most efficient After harvesting of fresh fruit bunches FFBs the major operations were chopping or cutting stripping selecting and sieving loading to drums for boiling off loading to the digester or press for crushing and or pressing and clarifying of palm oil Family labor hired labor or both contributed greatly to the success of the milling operations Family labor was not paid but motivations were given to family members while hired labor was paid per activity The average cost of labor per ton of FFB in the study area was 8 812 FCFA for both peak and low seasons The average net return in the processing and marketing of 1 ton of FFB was 32 207 FCFA in peak season and 46 556 FCFA in low season This income generating activity was ranked as the first main source of income in the study area and has valuable contributions in household livelihood The production of palm kernel oil and local soap was also recorded in the area but this was mainly for home use and not for sale Poor accessibility and unstable prices were the main constraints in the production process While the men were dominant in processing women were dominant in the commercialization of RPO Artisanal palm oil milling is a lucrative business in the area and will go a long way to alleviate poverty if the smallholders could come together and form a dynamic scheme

to those who planned the project that the liberation of the serfs involved a complete overhaul of agriculture as it was then known as Europe moved from feudalism to capitalism For this reason Prussia was careful in implementing the reform and did not rush after seeing the Kingdom of Westphalia perishing under its crushing debt accumulated in part from Napoleon s failed Russian campaign The basic hypothesis of this book is that slave labor can never be efficient and will therefore disappear by itself However this process of disappearance can take many years For instance two generations after the importation of slaves to North America had ended the states still fought over the issue and this despite the fact that Ely Whitney had invented the Cotton Gin in 1793 and already then made slavery in cotton production literally superfluous While there have been several books on the economics of American slavery few studies have examined this issue in an international context The contributions in this book address the economics of unfree labor in places like Prussia Westphalia Austria Argentina and the British Empire The issue of slavery is still a hotly debated and widely studied issue making this book of interest to academics in history economics and African Studies alike *Transnational Business Governance Interactions* Stepan Wood, Rebecca Schmidt, Errol Meidinger, Burkard Eberlein, Kenneth W. Abbott, 2019-12-27 From agriculture to sport and from climate change to indigenous rights transnational regulatory regimes and actors are multiplying and interacting with poorly understood effects This interdisciplinary book investigates whether how and by whom transnational business governance interactions TBGIs can be harnessed to improve the quality of transnational regulation and advance the interests of marginalized actors
