Arguments and Arguing Thomas A. Hollihan, Kevin T. Baaske, 2015-11-17 The latest edition of *Arguments and Arguing* contains the same balance of theory and practice breadth of coverage current and relevant examples and accessible writing style that made previous editions so popular in hundreds of classrooms The authors draw from classic and recent argumentation theory and research contextualized with well chosen examples to showcase a narrative style of argumentation and the values and attitudes of audiences Readers learn how to employ both formal and informal argumentative strategies in an array of communication forums from interpersonal interactions to academic debate to politics to business A newly added chapter on visual argumentation and a striking color photo insert demonstrate the value and power of visual elements in the construction of arguments The ability to argue is necessary if people are to solve problems resolve conflicts and evaluate alternative courses of action While many are taught that arguing is counterproductive and arguments should be avoided Hollihan and Baaske illustrate that arguing is an essential and fundamental human activity Learning the art of effective argumentation entails a grasp of not only the strategies and principles of analysis and logical reasoning but also the importance of arguing in a positive and socially constructive fashion Structure of Argument 7th Ed + Re:writing Plus

Annette T. Rottenberg, Donna Haisty Winchell, 2011-08-05 *Logical Models of Legal Argumentation* H. Prakken, Giovanni Sartor, 2012-12-06 In the study of forms of legal reasoning logic and argumentation theory long followed separate tracks Legal logicians tended to focus on a deductive reconstruction of justifying a decision disregarding the dialectical process leading to the chosen justification Others instead emphasized the adversarial and discretionary nature of legal reasoning involving reasonable evaluation of alternative choices and the use of analogical reasoning Recently however developments in Artificial Intelligence and Law have paved the way for overcoming this separation Logic has widened its scope to defensible argumentation and informal accounts of analogy and dialectics have inspired the construction of computer programs Thus the prospect is emerging of an integrated logical and dialectical account of legal argument adding to the understanding of legal reasoning and providing a formal basis for computer tools that assist and mediate legal debates while leaving room for human initiative This book presents contributions to this development From a logical point of view it covers topics such as evaluating conflicting arguments weighing reasons modelling legal disputes as a dialogue game the role of the burden of proof the relation between principles rules reasons and facts and the relation between deductive and nondeductive arguments Written by leading scholars in the field and building on recent developments in logic and Artificial Intelligence the chapters provide a state of the art account of research on the logical aspects of legal argument Television Sitcom and Cultural Crisis

Holly Willson Holladay, Chandler L. Classen, 2024-06-21 This volume demonstrates that television comedies are conduits through which we might resist normative ways of thinking about cultural crises By drawing on Gramscian notion of crisis and the understanding that crises are overlapping interconnected and mutually constitutive the essays in this

collection demonstrate that situation comedies do more than make us laugh they also help us understand the complexities of our social world s moments of crisis Each chapter takes up the televisual representation of a modern cultural crisis in a contemporary sitcom and is grounded in the extensive body of literature that suggests that levity is a powerful mechanism to make sense of and cope with these difficult cultural experiences Divided into thematic sections that highlight crises of institutions and systems identity and representation and speculation and futurism this book will interest scholars of media and cultural studies political economy communication studies and humor studies

Argument Dialectics: The Place of Reasons in Logic Hubert Marraud,2025-06-12 This book is a systematic exposition of Argument Dialectics AD Despite its name argument dialectics is a logical approach to argumentation theory AD stands out among theories of argument because of three unusual features it is reasons based holistic and particularistic This implies that AD conceives of logic as a theory of the dialectical construction of reasons not as a theory of inferences Consequently contrary to other logical approaches AD focuses on the study of inter argumentative relations especially those of opposition and weighing The book makes an extensive use of the theory of reasons a branch of metaethics that has been a very valuable quarry of intuitions and concepts for the elaboration of a reason based theory of argument The oppositions generalism particularism and atomism holism proposed by Jonathan Dancy which play a central role in the book and in the development of AD have been adapted from the theory of reasons and the same can be said of the distinction between different statuses of reasons that AD associates with different kinds of counterarguments Conceiving of the theory of argument in terms of reasons has the effect of situating the paradigm of argumentation in practical argumentation reasoning about what to do rather than in theoretical argumentation about what to believe as inference based theories do Hence this book is of interest to argumentation theorists communication theorists epistemologists linguists moral philosophers and philosophers of law

The Intersubjective Being Structure of the World Wataru Hiromatsu, 2024-08-19 This book is a major early work of Japanese philosopher Wataru Hiromatsu 1933 1994 Originally published in 1972 the primary theme is overcoming the subject object schema of modern philosophy Hiromatsu seeks to replace this subject object schema with what he calls the intersubjective fourfold structure in which the given is valid as something more to someone as someone more This fourfold structure is not a sum of four independent elements but exists only as a functional relationship From this relationist point of view Hiromatsu develops his philosophical theory as a systematic critique of reification defined as the hypostatizing misconception of a functional relation

Reasonable Responses Catherine E. Hundleby, 2017-01-17 This tribute to the breadth and influence of Trudy Govier s philosophical work begins with her early scholarship in argumentation theory paying special attention its pedagogical expression Most people first encounter Trudy Govier s work and many people only encounter it through her textbooks especially A Practical Study of Argument published in many editions In addition to

the work on argumentation that has continued throughout her career much of Govier's later work addresses social philosophy and the problems of trust and response to moral wrongs The introduction by Catherine Hundleby situates Govier's research along the path of her unusual academic life While following the timeline of Govier's research publication in this collection the authors build on her work and suggest certain new connections between her argumentation theory and social philosophy A Practical Study of Argument first published in 1985 situates Govier among a distinct segment of informal logicians whose concerns about teaching reasoning to post secondary students orient their research Takuzo Konishi argues Moira Kloster evaluates Govier's progress in the challenge of providing critical thinking education to diverse and changing social contexts Shifting gears to social philosophy but still addressing education Laura Elizabeth Pinto explores the significance of Govier's work on trust for explaining the problem of audit culture for teaching At the centre of this volume social philosophy receives an abstract meta ethical defense from Linda Radzik Moving solidly into the domain of normative social philosophy Alice MacLachlan reconsiders Govier's condemnation of revenge by viewing it as a form of moral address but she notes how revenge as an act of communication contrasts with argumentation in lacking the respect that Govier maintains is intrinsic to argumentation MacLachlan ultimately agrees that revenge is morally indefensible The practical challenges of addressing others in the aftermath of wrongdoing especially in public contexts can make it difficult to distinguish between victims and combatants or wrongdoers Alistair Little and Wilhelm Verwoerd explain and Kathryn Norlock argues that forgiveness is psychologically vexed too People may recognize transformation to be in principle possible for all people Norlock argues and yet we may find the evidence regarding some particular evildoer sufficient to count that person as an exception Finally Govier responds to the various papers

From Argument Schemes to Argumentative Relations in the Wild Frans H. van Eemeren, Bart Garssen, 2019-10-23 This volume comprises a selection of contributions to the theorizing about argumentation that have been presented at the 9th conference of the International Society for the Study of Argumentation ISSA held in Amsterdam in July 2018 The chapters included provide a general theoretical perspective on central topics in argumentation theory such as argument schemes and the fallacies Some contributions concentrate on the treatment of the concept of conductive argument Other contributions are dedicated to specific issues such as the justification of questions the occurrence of mining relations the role of exclamation argumentative abduction eudaimonistic argumentation and a typology of logical ways to counter an argument In a number of cases the theoretical problems addressed are related to a specific type of context such as the burden of proof in philosophical argumentation the charge of committing a genetic fallacy in strategic manoeuvring in philosophy the necessity of community argument and connection adequacy for arguments with institutional warrants The volume offers a great deal of diversity in its breadth of coverage of argumentation theory and wide geographic representation from North and South America to Europe and China A Communitarian Theory of WTO Law Chios Carmody, 2023-12-21 The interdependence promoted by the WTO Agreement has

Schlesinger, Tamar Keren-Portnoy, Tamar Parush, 2001-10-04 An important tool for scientific study in any field is a formal language in which the phenomena can be described and hypotheses formulated In this book a formal notation is developed for the description of the cognitive structure of arguments The analyses based on this notation are more fine grained than the analyses in previous attempts and they are applicable not only to arguments but to all types of moves in a discourse Further the notational system

provides a basis for the description of relations between arguments and the structure of the discourse as a whole In the final chapter some empirical studies of retention of arguments in memory and of precise writing are reported based on hypotheses formulated in terms of the notational system

Adequate Connections James B. Freeman, 2025-03-25 This book presents a comprehensive picture of when the premises of an argument are adequately connected to its conclusion The author draws upon the familiar Toulmin model Rescher's discussion of presumption and burden of proof and L Jonathan Cohen's presentation of the method of relevant variables The book first assesses the warrant or inference rule connecting the premises to the conclusion To analyze this the author asks a series of questions such as should the warrant be evaluated by conclusive or defeasible standards Does the argument require that its premises if acceptable guarantee that the conclusion is acceptable also or does it allow the premises just to present a body of relevant evidence Is the inference rule backed or supported a priori or a posteriori These distinctions form four categories of warrants conclusive a priori defeasible a posteriori defeasible a priori and virtually conclusive a posteriori The warrants in each category are evaluated differently for how strongly the premises support the conclusion of arguments instantiating those warrants After presenting the rationale for this division and discussing our nonprobabilistic approach the author analyzes the connection adequacy for each of these types of warrants This book is of interest to scholars of argumentation theory
