*Changing the Rules* Barry L. Duncan, Andrew D. Solovey, Gregory S. Rusk, 1992-06-12 All therapists at some time or other are confronted with cases that do not fit the assumptions of their chosen theoretical model clients who should get better do not while others improve for reasons the model does not explain One lesson that can and should be drawn from such cases is that the client s perception of the therapist s behavior and of the intervention process is a powerful factor in therapeutic success or failure These relationship factors account for a significant proportion of change in psychotherapy yet

little has been written about how to utilize them Filling a gap in the literature this book presents a pragmatic application of these simple but difficult experiential lessons to the practice of individual couple and family therapy When should a therapist shift gears And how is it done CHANGING THE RULES presents a flexible methodology for practice that encourages clinicians to utilize their clients interpretations in constructing more effective interventions Providing a developmental and empirical context for the approach the book covers the initial interview and the selection design and delivery of interventions as well as issues such as ethics and gender bias Several case examples and two full length studies demonstrate each stage of the therapeutic process fully illustrating the approach and enabling the creative therapist to replicate it in practice Proposing a coherent framework for practice that empowers relationship effects enhances therapist flexibility and expands the repertoire of intervention strategies for working with individuals couples and families this volume is an invaluable resource for clinicians academicians and students regardless of theoretical orientation Handbook Of Family Therapy Alan S. Gurman,David P. Kniskern,2014-01-21 This volume reflects the achievements in developing new concepts and models of family therapy and new approaches to special clinical issues and problems during the 1980s Chapters by experts such as Boszormenyi Nagy Everett Guttman Lankton Liddle McGoldrick Madanes and Walsh offer insight into a variety of areas including systems theory cybernetics and epistemology contextual therapy Ericksonian therapy strategic family therapy treating divorce in family therapy practice ethnicity and family therapy and training and supervision in family therapy
