Soul Loss and the Shamanic Story Michael Berman, 2009-03-26 Stories from various cultures and periods of time can be identified which deal with a concept of soul loss that is essentially shamanic In shamanism soul loss is the term used to describe the way parts of the psyche become detached when we are faced with traumatic situations In shamanic terms these split off parts can be found in non ordinary reality and are only accessible to those familiar with its topography Case studies are presented to show how the way soul loss is dealt with by indigenous shamans differs from the way it is treated by neo shamanic practitioners Stories have traditionally been classified as epics myths sagas legends folk tales fairy tales parables and fables However the definitions of the terms have a tendency to overlap making it difficult to classify and categorize material For this reason a case can be made for the introduction of a new genre termed the shamanic story a story that has either been based on or inspired by a shamanic journey a numinous experience in non ordinary reality or one that contains a number of the elements typical of such a journey Within this new genre it is proposed that there exists a sub genre shamanic stories that deal specifically with soul loss and examples are presented and analysed to support this hypothesis

Contemporary Korean Shamanism Liora Sarfati, 2021-08-03 Once viewed as an embarrassing superstition the theatrical religious performances of Korean shamans who communicate with the dead divine the future and become possessed are going mainstream Attitudes toward Korean shamanism are changing as shamanic traditions appear in staged rituals museums films and television programs as well as on the internet Contemporary Korean Shamanism explores this vernacular religion and practice which includes sensory rituals using laden altars ecstatic dance and animal sacrifice within South Korea's hypertechnologized society where over 200 000 shamans are listed in professional organizations Liora Sarfati reveals how representations of

shamanism in national commercialized and screen mediated settings have transformed opinions of these religious practitioners and their rituals Applying ethnography and folklore research Contemporary Korean Shamanism maps this shift in perception about shamanism from a sign of a backward undeveloped Korea to a valuable indigenous cultural asset
