**in the Age of Robots and AI** Oliver Mitchell,2025-06-18 Launching a startup is like climbing a mountain just maybe more  
 treacherous I say this as I have spent years as a backpacker and entrepreneur While hiking through the Alaskan Tundra I  
 feared brown bears and crevasses Yet nothing prepared me for the responsibility of payroll for over 200 families relying on  
 my business plan to feed their children Unlike traditional software the mere smell of hardware sensors and robot gearing  
 sends shivers through most investors with red flags arising from the perceived capital inefficiencies and intense research and  
 development This is coupled with a high talent requirement before launching even a minimum viable product as these  
 inventions demand a cross section of skills mechanical electrical and software engineering To set out on the trail of uncrewed  
 success machine inventors and founders require a detailed field guide to meet customer demand and financing objectives My  
 goal for this book is to help you at a pivotal point in your ideation process and at the same time introduce you to a cadre of  
 potential mentors Through interviews with some of the most respected luminaries in this field I aim to help fortify your  
 resolve to follow your passions and build a billion dollar company The chapters of this book have been organized like a field  
 guide as if you are setting out on a trip in the wild Just like it s essential to satiate yourself before scaling mountains fast
