Histories of Technology, the Environment and Modern Britain brings together historians with a wide range of interests to take a uniquely wide lens view of how technology and the environment have been intimately and irreversibly entangled in Britain over the last 300 years. It combines for the first time two perspectives with much to say about Britain since the industrial revolution: the history of technology and environmental history. Technologies are modified environments just as nature is to varying extents engineered. Furthermore, technologies and our living and non-living environment are both predominant material forms of organisation and self-organisation that surround and make us. Both have changed over time in intersecting ways. Technologies discussed in the collection include bulldozers, submarine cables, automobiles, flood barriers, medical devices, museum displays, and biotechnologies. Environments investigated include bogs, cities, farms, places of natural beauty, and pollution land and sea. The book explores this diversity but also offers an integrated framework for understanding these intersections. *Mapping the Posthuman* Grant Hamilton, Carolyn Lau, 2023-12-22

This book works to delineate some of the major routes by which science and art intersect. Structured according to the origin myths of the posthuman that continue to shape the idea of the human in our technological modernity, this volume gives space to narratives of alter-modernity that resonate with Ursula K. Le Guin's call for a new kind of story which exposes the violence and exploitation driven by a sustained belief in human exceptionalism, anthropocentrism, and cultural superiority. In this context, the posthuman myths of multispecies flourishing given in this collection, which are situated across a range of historical times and locations and media and modalities, are to be thought of as kernels of possible futures that can only be realized through collective endeavour.

Post-Theories in Literary and Cultural Studies Zekiye Antakyalioglu, 2022-04-25

Post-Theories in Literary and Cultural Studies focuses on the shifting paradigms in literary and cultural studies. Prompted by the changes and problems on the global scale, the last two decades have seen a resurgence of scholarly interest in theories which are more embedded in the social realities and human condition. This volume shows that theory can reinvent theory and re-define criticism according to the demands of the new millennium. In this context, it examines new ways of considering the relation of post-theory to the concepts such as ethics, aesthetics, truth, value, authenticity, human, and reality to understand the mindset of the new century. This volume presents the various suggestions and concerns of post-theoretical studies that reflect the sensibilities of the contemporary social and cultural life. The book is a source of reference to develop an understanding of this change of attitude in post-theoretical studies towards a more directly and sincerely responsive approach to the current problems worldwide, their representations in literature and language, reflections in theory, roots in socio-political domains, and effects on the material reality. *Fifty Key Figures in Cyberpunk Culture* Anna McFarlane, Graham J.
