existing literature and explains the novel insights you obtained The Introduction is written to pose the questions that are answered in the Discussion and give the necessary background information It is written after the Results and Discussion to make sure it is a perfect match The M M is the easiest to write A good abstract is essential for attracting readers How to write that is described in detail The title is the last piece of the puzzle The book contains many practical examples that explain the general principles of good writing These examples are all from the Life Sciences and so are the anecdotes that illustrate the concepts making the information directly applicable All kinds of tips and suggestions are provided for improving readability and accessibility of your manuscript thus making it easier acceptable In addition background information on the basics of science is supplied that helps to avoid common mistakes that cause rejection of manuscripts that report on otherwise good science Telegraphic Journal and Monthly Illustrated Review of Electrical Science ,1879 *The Saturday Review of Politics, Literature, Science and Art* ,1917
