The Sexual Victimization of College Women Bonnie Fisher, 2000 **The Sexual Exploitation of Missing Children** Gerald T. Hotaling, 1988 **The Context of HIV Risk Among Drug Users and Their Sexual Partners**, 1994 *The Sexual Century* Ethel Spector Person, 1999-01-01 Over the course of the past century sexual liberation has transformed the way in which most of us regard our bodies and live our sexual lives Now a preeminent psychoanalytic theoretician on sex and gender discusses what has gone into this unquiet revolution the roles played by sexologists and psychoanalysts antibiotics and birth control the liberation movements and Freud's insight that sex has as much to do with the mind as with the genitals In this collection of new and previously published papers Ethel Person writes of the centrality of sexuality to our identity She describes the role of fantasy in desire its different expression in the sexes and the way in which desire is inevitably intertwined with power Her classic papers on transvestism transsexualism and cross dressing homosexuals written with Lionel Ovesey help us to understand how gender and sex develop in all of us The public acceptance of the transsexual says Person is emblematic of the profound scientific and intellectual shifts that have taken place in the past hundred years The way that sex and gender develop and are experienced and expressed is the result not only of nature and nurture but also of the cultural zeitgeist its unspoken values and biases

The Sexual Harassment of Women in the Workplace, 1600 to 1993 Kerry Segrave, 2013-04-02 While sexual harassment of women in the workplace has been discussed for decades it is still a pervasive problem This book looks at the history of that harassment from the 1600s to the early 1990s from long forgotten domestic servants in England of the 1600s to abused Japanese textile workers of 1900 to Anita Hill in 1991 America Coverage is worldwide with emphasis on the United States and the period 1800 to the present Harassment affects women from all walks of life from unskilled to professional those in traditionally female jobs those in traditionally male jobs and all the rest Harassment occurs in factories coal mines construction sites law offices dental offices government offices Capitol Hill and at every other work site So bad was it in some factories that women took to carrying knives for self protection Women have put their economic existence on the line by striking over sexual harassment

Addressing the Sexually Transmitted Infections Epidemic in the United States: A Sociomedical Perspective Christopher Williams, Laura Skrip, Darren Whitfield, Keith L. Gray, 2023-12-04 Rates of sexually transmitted infections STIs have significantly increased in the United States Per capita estimates reveal approximately 68 million prevalent and 26 million incident STIs nationally Gonorrhea syphilis and chlamydia the three reportable STIs reached levels not seen in the last fifty years and this resurgence is concurrent with increasing antimicrobial resistance and a dearth of viable candidates in the vaccine pipeline A seminal report by the National Academies of Sciences Engineering and Medicine Sexually Transmitted Infections Adopting a Sexual Health Paradigm confirms that STIs rank among the most pressing and intractable public health threats Furthermore rising rates of STIs exact a substantial societal medical and economic burden that strain public health capacity which has been

substantially debilitated in the wake of the Covid 19 pandemic STIs can have serious consequences for sexual reproductive and overall health Untreated syphilis for instance is directly implicated in neurological cardiovascular and dermatological disease Human papillomavirus is a known cause of cervical cancer and is the most common cancer among women globally Hepatitis B increases risk for cirrhosis and primary liver cancer Despite reductions in HIV transmission and improvements in prevention and treatment infections among women girls adolescents and mother to child transmission remain unacceptably high Marginalized racial ethnic minorities LGBTQ persons vulnerable at risk adolescents and young adults and other underrepresented populations are more susceptible to STIs as they negotiate an array of factors that can delay and even preclude access to preventive interventions The United States spends substantially more on STI prevention and treatment yet it consistently bares a disproportionate burden of sexually transmitted infections compared to other Western industrialized nations Access to healthcare erosion and diversion of public health capacity racism discrimination stigma substandard education and poverty have all been identified as important contributors to the trajectory of acute sexually transmitted infections Furthermore upstream drivers such as national state and local public health policies have been associated with population level STI risk prevention and treatment and as such offer opportunities for ecological observational and multi level analyses to assess their direct and indirect impact on sexual health outcomes In this thematic collection we aim to present an interdisciplinary collection of high quality articles centered on the premise that the rise of emerging and re emerging STIs can be attributed in part to a complex interaction of sociomedical factors beyond individual behavioral risk profiles This Research Topic welcomes a variety of manuscript formats including original research brief reports systematic reviews and perspective manuscripts involving sociomedical factors social determinants of health health disparities infectious disease epidemiology and other drivers including health policies that act as barriers and facilitators of effective STI prevention and treatment Manuscripts that examine structural community institutional interpersonal and broad individual factors linked to STIs are very well suited for this collection Topic areas include but are not limited to Structural racism discrimination and stigma and their influence on prevention treatment and support services among vulnerable and marginalized populations Housing and income insecurity that impede sexual reproductive and overall health Biological factors that affect the spread of STIs including their asymptomatic nature and the influence of sex as a biological variable Intimate partner violence harassment and intimidation Substance abuse sex work sexual networks and normative sexual attitudes and beliefs that impede the adoption of preventive health promoting behaviors Priority populations including adolescents men who have sex with men youth who are LGBTQ and the incarcerated Impact of HIV pre exposure prophylaxis PrEP uptake on STI incidence Culturally specific biopsychosocial behavioral and community based STI interventions to treat and support those afflicted with STIs Community mobilization and community based organization to reduce STIs Community level prevalence of infectious agents Local and holistically integrated STI clinics Public health STI workforce capacity Health

Dual Attraction Martin S. Weinberg,Colin J. Williams,Douglas W. Pryor,1995-06-01 For the past two generations extensive research has been conducted on the determinants of homosexuality But until now scant attention has been paid to what is perhaps the most mysterious and potentially illuminating variation of human sexual expression bisexuality Today as ignorance and fear of AIDS makes greater awareness of all forms of sexual behavior an urgent matter of private and public consequence leading sex researchers Martin Weinberg Colin Williams and Douglas Pryor provide us with the first major study of bisexuality Weinberg Williams and Pryor explore the riddle of dual attraction in their study of 800 residents of San

Francisco Fieldwork intensive interviews and surveys provided a wealth of data about the nature of bisexual attraction the steps that lead people to become bisexual and how sexual preference can change over time They found that heterosexuals more often than homosexuals become bisexual that bisexual men and women differ markedly in their sexual behavior and romantic feelings that most bisexuals ultimately settle into long term relationships while continuing sexual activity outside those relationships and they also explain why transsexuals often become bisexual Moreover the authors discovered that as the AIDS crisis unfolded many bisexual men entered into monogamous relationships with women and bisexual women into more lesbian relationships Recent media accounts attest that a growing number of researchers and writers are narrowing the fundamental cause of sexual preference to a single factor biology But if as this study shows learning plays a significant part in helping people traverse the boundaries of gender if past and present intimate relationships influence their changing preferences and if bisexual activity is inseparable from a social environment which provides distinctive sexual opportunities then a mosaic of factors far more complex than those previously considered must be entertained in explaining the fuller spectrum of sexual preferences Dual Attraction is one of the most significant contributions to our understanding of sexuality since the original Kinsey reports and Bell and Weinberg s 1978 international bestseller *Homosexualities* It is must reading for all those interested in the study of sexual behavior especially now since the onset of AIDS

Sexual and Reproductive Health Paul Van Look, Kristian Heggenhougen, Stella R. Quah, 2011-01-10 This volume presents the highlights of current global thinking about sexual and reproductive health Major changes have taken place in the last 15 years in the way decision makers think about the subject and the manner in which programmes deliver comprehensive sexual and reproductive health services The turning point was the International Conference on Population and Development ICPD held in Cairo Egypt in 1994 ICPD was a watershed for several reasons First more than in any of the preceding United Nations population conferences the issue of population was clearly placed as being central to sustainable development Second the narrow focus on population growth the population bomb which had been a neo Malthusian concern and preoccupation ever since the Club of Rome published its 1972 report *Limits to Growth* was replaced by the comprehensive concept of sexual and reproductive health Third and linked to the definition and introduction of the reproductive health concept was the strong call for a paradigm shift away from a policy environment driven by demographic considerations sometimes to the point of using coercion in family planning services in order to reach demographic targets to an environment that recognized the right of individuals to make their own choices And last but not least ICPD as well as the Fourth World Conference on Women FWCW held the following year in Beijing People s Republic of China strongly emphasized that the rights of women and men to good sexual and reproductive health are firmly grounded in universal human rights Provided by publisher
