road The answer is simple there is great joy in working with the talented and able participants engaged in a project while pursuing and satisfying the organization's needs Prescribed procedures are part of project management It is these procedures that provide stepping stones from where we are today and what we want and expect to be tomorrow Many procedures and best practices are based on A Guide to the Project Management Body of Knowledge and ISO 21500 Guidance on Project Management These guides provide best practices and international standards as well as frameworks that are coupled with steps that should be followed to effectively implement the best practices However neither guide discusses how to ensure that people will welcome the results of a project with open arms and embrace wholeheartedly the impact that has been imposed on them Since people are involved in these projects their behavior and well being must be provided for especially when environmental and procedural changes are being made Ignoring the psychological and emotional impact on people may result in project failure It is the project manager's responsibility to examine understand and implement best practices determine the level at which a best practice is used and accommodate the physical and mental needs of people affected by the projects
