St Louis witnessed the beginning of the shift in anthropological research from nineteenth century evolutionary racial models to the cultural relativist paradigm that is now a cornerstone of modern American anthropology. Racist pseudoscience nonetheless reappears to this day in the realm of sports. *Index-catalogue of the Library of the Surgeon-General's Office, United States Army National Library of Medicine (U.S.), 1972*      **Patents for Lands Issued to Certain Railroads, Etc. ...** United States. **Elements of Controversy** Barton C. Hacker, 1994-01-01 Unforgettable congressional hearings in 1978 revealed that fallout from American nuclear weapons testing in the 1950s had overexposed hundreds of soldiers and other citizens to radiation. Faith in governmental integrity was shaken and many people have assumed that such overexposure caused great damage. Yet important questions remain the most controversial being did the radiation overexposure in fact cause the cancers and birth defects for which it has been blamed. *Elements of Controversy* is the result of a decade of exhaustive research in AEC documentary records and the full clinical and epidemiological literature on radiation effects. More concerned with uncovering the historical story than with assigning blame, Barton Hacker concludes that every precaution was taken by the AEC to avoid harming test participants or bystanders. And he points out the biomedical literature suggests that these precautions worked. Yet top officials in Washington for whom the success of nuclear weapons was of overriding importance had asserted that testing involved no risks at all. Discrepancies between unverifiable government claims and the revelations that some actual risk was present explain the origins and angry persistence of the controversies. Hacker argues The Department of Energy delayed publication of Hacker's study for five years and while his controversial book is sure to draw objections from both sides of the radiation hazard debates it will provide a much needed guide to understanding their polemics.
