**Systems Programming in Unix/Linux** K.C. Wang, 2018-08-27. Covering all the essential components of Unix/Linux, including process management, concurrent programming, timer and time service, file systems, and network programming, this textbook emphasizes programming practice in the Unix/Linux environment. *Systems Programming in Unix/Linux* is intended as a textbook for systems programming courses in technically oriented Computer Science Engineering curricula that emphasize both theory and programming practice. The book contains many detailed working example programs with complete source code. It is also suitable for self-study by advanced programmers and computer enthusiasts. Systems programming is an indispensable part of Computer Science Engineering education. After taking an introductory programming course, this book is meant to further knowledge by detailing how dynamic data structures are used in practice, using programming exercises and programming projects on such topics as C structures, pointers, link lists, and trees. This book provides a wide range of knowledge about computer system software and advanced programming skills, allowing readers to interface with operating system kernel, make efficient use of system resources, and develop application software. It also prepares readers with the needed background to pursue advanced studies in Computer Science Engineering, such as operating systems, embedded systems, databases, systems data mining, artificial intelligence, computer networks, network security, distributed and parallel computing.

**A Survey on Today's Smartphone Usage** Tobias Himmelsbach, 2012-04-20. Diploma Thesis from the year 2011 in the subject Computer Science. Miscellaneous grade 2/3. Technical University of Berlin. Agententechnologien in betrieblichen Anwendungen. language English. abstract. The smartphone market is evolving rapidly, irrespective of the well-known spread within the business sector. In recent years, the average users tend to replace their traditional mobile phones, PDAs, and Palms with smartphones. These

devices have become a pervasive part of everyday life. Dealing with huge amounts of data, the mobile devices and applications demand for certain security standards cannot be underestimated. In recent studies, the individual user's needs in terms of technical features, applications, etc. have not been addressed and analyzed properly. To capture the problem in its full extent, it is vital to understand the user's expectations. Besides, the usage patterns have to be described especially against the background of security aspects. As mentioned before, recent analyzes did not specifically ask what the user expects from a smartphone. Hence, the main objective of this work is to get a broad picture on how smartphones are used today and what users expect, taking into consideration security aspects. An international web-based online survey was designed and performed to measure and analyze users' behaviour when using smartphones, with the aim of finding out what they want and expect from a smartphone. The main goals were to identify user needs in the context of smartphones, to analyze their knowledge and acquisition to security aspects, and to get significant data about the user's behaviour. The main findings of the survey are that, on the one hand, most of the users want a smartphone to provide classic mobile phone features such as performing phone calls, writing messages, or storing contacts. On the other hand, they want a smartphone to provide mobile internet access, navigation features, multimedia aspects, a comfortable usability, and a good look and feel design. The brand, price, and battery performance play a minor role for them. With respect to security aspects, most of the users have a good knowledge about security in general, pointing out that the security of the smartphone is a very important aspect for them. The obtained results can be provided as recommendations to smartphone vendors, application developers, and carriers who can use them in product portfolio management and product development.
