Tourism and Regional Science Soushi Suzuki, Karima Kourtiti, Peter Nijkamp, 2021-07-27 This book provides new roads perspectives and a synthesis for tourism and regional science research Tourism has become one of the most dynamic sectors in the economy and has exhibited a structurally growing importance over the past decades In many

countries the economic significance of tourism now exceeds that of traditionally strong sectors like agriculture or transportation. It is noteworthy that in recent times tourism research has gained great momentum from the perspective of the leisure society, the psychological tension between hard work and a more relaxed lifestyle, and the productivity enhancing or productivity diminishing effects of leisure recreation and tourism. An abundance of new literature in the field of tourism management can also be found for instance in the areas of hospitality management, cultural events management, destination competitiveness, policy and marketing, and transportation and logistics strategies, while much attention is also being paid to the opportunities provided by digital technology for the tourism sector. In addition, in the light of the many negative externalities of a rapidly growing tourism sector, there is also an abundant literature on the environmental and sustainability effects of tourism. This book has the following objectives: to explore the interwoven connection between regional science and tourism research; to suggest promising pathways for innovative regional science research at the interface of tourism and space; and to demonstrate the need for a new perspective on the tourism and regional science nexus by means of empirical studies.

Iron Age and Hardware, Iron and Industrial Reporter, 1894 Regional Research Frontiers - Vol. 1 Randall Jackson, Peter Schaeffer, 2017-04-17. This volume focuses on frontiers in regional research and identifies trends and future developments in the areas of innovation, regional growth, and migration. It also addresses topics such as mobility, regional forecasting, and regional policy, and includes expert contributions on disasters, resilience, and sustainability. Building on recent methodological and modelling advances, as well as on extensive policy analysis experience, top international regional scientists identify and evaluate emerging new conceptual and methodological trends and directions in regional research. This book will appeal to a wide readership from regional scientists and economists to geographers, quantitatively oriented regional planners, and other related disciplines. It offers a source of relevant information for academic researchers and policy analysts in government and is also suitable for advanced teaching courses on regional and spatial science, economics, and political science.
