Teaching And Learning In The Language Classroom:

Process and Experience in the Language Classroom Michael Legutke, Howard Thomas, Christopher N.

Candlin, 2014-06-06 Process and Experience in the Language Classroom argues the case for communicative language teaching as an experiential and task driven learning process. The authors raise important questions regarding the theoretical discussion of communicative competence and current classroom practice. They propose ways in which Communicative Language Teaching should develop within an educational model of theory and practice incorporating traditions of experimental and practical learning and illustrated from a wide range of international sources. Building on a critical review of recent language teaching principles and practice, they provide selection criteria for classroom activities based on a typology of communicative tasks drawn from classroom experience. The authors also discuss practical attempts to utilise project tasks both as a means of realising task based language learning and of redefining the roles of teacher and learner within a jointly constructed curriculum.

Understanding Language Classroom Contexts Martin Wedell, Angi Malderez, 2013-04-11

Arguably the whole point of education is to effect change in what people know and are able to do. Globalization has contributed to a common perception worldwide of the need to introduce changes to the teaching and learning of languages. The success of many attempts to do so has been limited by insufficient consideration of implementation contexts. Understanding Language Classroom Contexts explores and illustrates how what happens in any language classroom is influenced by and can be an influence on the contexts in which it is situated. A clear understanding of these influences is thus the starting point for planning effective change. The book considers many visible and invisible features of the multiple layers of any context and provides a framework for understanding the types of factors that may influence whether changes planned by a teacher or externally initiated are likely to be successful. The book will help teachers and educational managers or change planners outside the classroom to understand why their classrooms are as they are and so to make informed decisions about what can or cannot or not easily be changed and suggests how any changes might be appropriately managed.

Research in the Language Classroom Christopher Brumfit, Rosamond Mitchell, 1990. Teaching and Learning Language and Culture Michael Byram, 1994-01-01. Approaches language learning as comprising several dimensions including grammatical competence, change in attitudes, learning about another culture and reflecting on one's own. Team Teaching and Team Learning in the Language Classroom Akira Tajino,Tim Stewart,David Dalsky,2015-12-14

This book reignites discussion on the importance of collaboration and innovation in language education The pivotal difference highlighted in this volume is the concept of team learning through collaborative relationships such as team teaching It explores ways in which team learning happens in ELT environments and what emerges from these explorations is a more robust concept of team learning in language education Coupled with this deeper understanding the value of participant research is emphasised by defining the notion of team to include all participants in the educational experience Authors in this volume position practice ahead of theory as they struggle to make sense of the complex phenomena of language teaching and learning The focus of this book is on the nexus between ELT theory and practice as viewed through the lens of collaboration The volume aims to add to the current knowledge base in order to bridge the theory practice gap regarding collaboration for innovation in language classrooms
