Water: The Forest's Most Valuable Resource (90 Minute Lesson Plan)

This lesson can be completed in the classroom, or at home using teleconferencing (such as Zoom, Skype, Google Meet, Facetime, etc.) and/or shared documents (such as Google Docs) during group activities such as discussions and group projects. Sections requiring use of one of these remote-access tools have been marked (). Before beginning this lesson, explain to your students how you would like them to participate in these group activities if your class will be completing the lesson at home.*

Today's Topic: Water from the Forest

NGSS 5-ESS2-2: Describe and graph the amounts and percentages of water and fresh water in various reservoirs to provide evidence about the distribution of water on Earth.

Introduction to Water in California (5 minutes)*

Have students watch the video, [Water: The Forest's Most Valuable Resource](#), to start their exploration of the water supplies in California. As students watch, instruct them to pay attention to where California gets its water. Then, ask students what a watershed is and if they think they are living in one.

Read and Respond

Read (10 minutes)

Students should read each of the four sections (Water: Where it is Found, California's Water Resources, California's Watersheds, and Managing Water Sources in California) to learn about water, how it is used, where water is found in California, California's watersheds, and how to manage fresh water supplies. Students can read independently, as a whole class, or in small groups.
