Pasta Silvano Serventi, Françoise Sabban, 2002 Ranging from the imperial palaces of ancient China and the bakeries of fourteenth-century Genoa and Naples all the way to the restaurant kitchens of today, *Pasta* tells a story that will forever change the way you look at your next plate of vermicelli. Pasta has become a ubiquitous food present in regional diets around the world and available in a host of shapes, sizes, textures, and tastes. Yet although it has become a mass-produced commodity, it remains uniquely adaptable to innumerable recipes and individual creativity. *Pasta: The Story of a Universal Food* shows that this enormously popular food has resulted from a lengthy process of cultural construction and widely diverse knowledge, skills, and techniques. Many myths are intertwined with the history of pasta, particularly the idea that Marco Polo brought pasta back from China and introduced it to Europe. That story, concocted in the early twentieth century by the trade magazine *Macaroni Journal*, is just one of many fictions unmasked here. The true homelands of pasta have been China and Italy. Each gave rise to different but complementary culinary traditions that have spread throughout the world. From China has come pasta made with soft wheat flour, often served in broth with fresh vegetables, finely sliced meat, or chunks of fish or shellfish. *Pastasciutta*, the Italian style of pasta, is generally made with durum wheat semolina and presented in thick, tomato-based sauces. The history of these traditions, told here in fascinating detail, is interwoven with the legacies of expanding and contracting empires, the growth of mercantile guilds, and mass industrialization, and the rise of food as an art form. Whether you are

interested in the origins of lasagna the strange genesis of the Chinese pasta bing or the mystique of the most magnificent pasta of all the timballo this is the book for you So dig in
