Whole Earth Discipline An Ecopragmatist Manifesto Stewart Brand:

Whole Earth Discipline Stewart Brand, 2009 With a combination of scientific rigor and passionate advocacy Brand shows exactly where the sources of environmental dilemmas lie and offers a bold and inventive set of policies and solutions for creating a more sustainable society

The Visioneers W. Patrick McCray, 2013 In 1969 Princeton physicist Gerard O'Neill began looking outward to space colonies as the new frontier for humanity's expansion A decade later Eric Drexler an MIT trained engineer turned his attention to the molecular world as the place where society's future needs could be met using self replicating nanoscale machines Patrick McCray traces how these visioneers and the communities they fostered blended countercultural ideals with hard science entrepreneurship libertarianism and unbridled optimism about the future

Perspectives on Ecocriticism Ingemar Haag, Karin Molander Danielsson, Marie Öhman, 2019-05-08 This volume gathers together papers presented at the conference Ecocriticism in the Nordic Countries Yesterday Today Tomorrow held in Västerås Sweden in 2017 organized by the research group Ecocritical Forum at Mälardalen University The conference which was an attempt to survey local ecocritical activities transcended Nordic boundaries engaging scholars from Europe and the United States This expansion from the local to the global mirrors the subject of the conference ecocriticism a cross disciplinary field of research in the intersection of environmental issues and cultural expressions The chapters here engage with topical issues such as the Anthropocene sustainability in education and civilizational critique as well as schools of thought such as materialism dark ecology and animal studies The contributions discuss several types of cultural expressions including film and other visual media university course design and Nordic and English language novels and poetry This volume will attract the interest of readers from a number of different backgrounds both in the Nordic countries and internationally

Reproductive Technologies as Global Form Michi Knecht, 2012-07 In the thirty five years since the first test tube baby in vitro fertilization and other methods of reproductive assistance have become a common aspect of family life and medicine in affluent nations and increasingly throughout the world How do persons seeking treatment donors and medical experts make use of these reproductive technologies How in crossing borders between nations do they manage to evade legal and bioethical regulations And how do they make sense of these new modes of making kinship against the backdrop of diverse world views and social settings

The Oxford Handbook of Humanism Anthony B. Pinn, 2021 As a system of thought that values human needs and experiences over supernatural concerns humanism has gained greater attention amid the rapidly shifting demographics of religious communities This outlook has taken on global dimensions with activists artists and thinkers forming a humanistic response not only to religion but to the pressing social and political issues of the 21st century The Oxford Handbook of Humanism aims to explore the subject by analyzing its history its philosophical development and its influence on culture It will also discuss humanism as a global phenomenon an approach that has often been neglected in more Western focused works

The Deepening Crisis Craig Calhoun, Georgi M. Derluguian, 2011-05 A co publication with

the Social Science Research Council Investing in Resources Adrian Day, 2010-09-09 How to analyze and understand investment opportunities in the resources market Investing in resource markets is quite different from other sectors extreme cyclicalities very long cycles huge corrections continual mergers and acquisitions and huge capital needs Written by industry pioneer Adrian Day Investing in Resources How to Profit from the Outsized Potential and Avoid the Outsized Risks details the factors that affect investing in resource markets and how if an investor understands those factors the resource market can be a great place to realize very strong gains The book Explains the major factors driving resource prices higher including new demand from China and the difficulty in finding new economic resources Discusses how the resource industry is changing and addresses where we are in the Super Cycle Details how to profit by investing in base metals gold silver and agriculture while explaining the peculiar political environmental and social risks inherent in resource markets In recent years deciding how to minimize the excessive risks of investing in resource markets has proven difficult for even the most experienced investors Thanks to Investing in Resources the task of how and where to invest in this lucrative market is made easier

Futurology Express Philip McShane, 2013-09-25 Envisages a population of collaborators some with a knack for recovering the story of lost or overlooked ideas others with a knack for visioning a better future and all bent towards cyclically radiating the light of timely ideas in markets schools and town halls *Fewer, Richer, Greener* Laurence B. Siegel, 2019-12-05 How the world has become much better and why optimism is abundantly justified Why do so many people fear the future Is their concern justified or can we look forward to greater wealth and continued improvement in the way we live Our world seems to be experiencing stagnant economic growth climatic deterioration dwindling natural resources and an unsustainable level of population growth The world is doomed they argue and there are just too many problems to overcome But is this really the case In *Fewer Richer Greener* author Laurence B Siegel reveals that the world has improved and will continue to improve in almost every dimension imaginable This practical yet lighthearted book makes a convincing case for having gratitude for today's world and optimism about the bountiful world of tomorrow Life has actually improved tremendously We live in the safest most prosperous time in all human history Whatever the metric food health longevity education conflict it is demonstrably true that right now is the best time to be alive The recent dramatic slowing in global population growth continues to spread prosperity from the developed to the developing world Technology is helping billions of people rise above levels of mere subsistence This technology of prosperity is cumulative and rapidly improving we use it to solve problems in ways that would have been unimaginable only a few decades ago An optimistic antidote for pessimism and fear this book Helps to restore and reinforce our faith in the future Documents and explains how global changes impact our present and influence our future Discusses the costs and unforeseen consequences of some of the changes occurring in the modern world Offers engaging narrative accurate data and research and an in depth look at the best books on the topic by leading thinkers Traces the history of economic progress and explores its consequences for human life around the world

Fewer Richer Greener Prospects for Humanity in an Age of Abundance is a must read for anyone who wishes to regain hope for the present and wants to build a better future *We Alone* David Western,2020-11-24 A thoughtful exploration of how humans have endangered the Earth but can pull it back from the brink as told by a renowned conservationist This personal and thoughtful book by renowned Kenya conservationist David Western traces our global conquest from Maasai herders battling droughts in Africa to the technological frontiers of California Western draws on a half century of research in the savannas and his own life s journey to argue that conservation is not a modern invention The success of all societies past and present lies in conservation practices breaking biological barriers and learning to live in large cooperative groups able to sustain a healthy environment Our ecological emancipation from nature enabled us to expand our horizons from conserving food and water for survival to saving whales elephants and our cultural heritage In the Anthropocene our scientific knowledge and modern sensibilities offer hope for combating global warming and creating a planet able to sustain the wealth of life but only if we use our unique cultural capacity of cooperation to plan our future **New Earth Politics** Simon Nicholson,Sikina Jinnah,2016-03-04 Prominent scholars and practitioners in the field of global environmental politics consider the ecological and political realities of life on the new earth and probe the field s deepest and most enduring questions at a time of increasing environmental stress Arranged in complementary pairs included are reflections on environmental pedagogy analysis of new geopolitical realities reflections on the power of social movements and international institutions and calls for more compelling narratives to promote environmental action **Method in Theology 101 AD 9011** Philip McShane,2012 Points to a revolution in religious studies and practice beyond the aporia of postmodernism The focus is on direct discourse that pronounces reconciles and communicates and that is characteristic of theology in oratione recta **Groovy Science** David Kaiser,W. Patrick McCray,2016-05-31 Did the Woodstock generation reject science or re create it An enthralling study of a unique period in scientific history New Scientist Our general image of the youth of the late 1960s and early 1970s is one of hostility to things like missiles and mainframes and plastics and an enthusiasm for alternative spirituality and getting back to nature But this enlightening collection reveals that the stereotype is overly simplistic In fact there were diverse ways in which the era s countercultures expressed enthusiasm for and involved themselves in science of a certain type Boomers and hippies sought a science that was both small scale and big picture as exemplified by the annual workshops on quantum physics at the Esalen Institute in Big Sur or Timothy Leary s championing of space exploration as the ultimate high Groovy Science explores the experimentation and eclecticism that marked countercultural science and technology during one of the most colorful periods of American history Demonstrate s that people and groups strongly ensconced in the counterculture also embraced science albeit in untraditional and creative ways Science Each essay is a case history on how the hippies repurposed science and made it cool For the academic historian Groovy Science establishes the deep mark on American culture made by the countercultural innovators For the non historian

the book reads as if it were infected by the hippies democratic intent no jargon few convoluted sentences clear arguments and a sense of delight Nature In the late 1960s and 1970s the mind expanding modus operandi of the counterculture spread into the realm of science and sh t got wonderfully weird Neurophysiologist John Lilly tried to talk with dolphins Physicist Peter Phillips launched a parapsychology lab at Washington University Princeton physicist Gerard O Neill became an evangelist for space colonies Groovy Science is a new book of essays about this heady time Boing Boing **Sacred Sense** William P. Brown,2015 All too often Scripture is read only to find answers to life s perplexing questions to prove a theological point or to formulate doctrine But William Brown argues that if read properly what the Bible does most fundamentally is arouse a sacred sense of life transforming wonder In this book Brown helps readers develop an orientation toward the biblical text that embraces wonder He explores reading strategies and offers fresh readings of seventeen Old and New Testament passages identifying what he finds most central and evocative in the unfolding biblical drama The Bible invites its readers to linger in wide eyed wonder Brown says and his Sacred Sense shows readers how to do just that A Field on Fire Mark D. Hersey,Ted Steinberg,2019-01-29 A frank and engaging exploration of the burgeoning academic field of environmental history Inspired by the pioneering work of preeminent environmental historian Donald Worster the contributors to A Field on Fire The Future of Environmental History reflect on the past and future of this discipline Featuring wide ranging essays by leading environmental historians from the United States Europe and China the collection challenges scholars to rethink some of their orthodoxies inviting them to approach familiar stories from new angles to integrate new methodologies and to think creatively about the questions this field is well positioned to answer Worster s groundbreaking research serves as the organizational framework for the collection Editors Mark D Hersey and Ted Steinberg have arranged the book into three sections corresponding to the primary concerns of Worster s influential scholarship the problem of natural limits the transnational nature of environmental issues and the question of method Under the heading Facing Limits five essays explore the inherent tensions between democracy technology capitalism and the environment The Crossing Borders section underscores the ways in which environmental history moves easily across national and disciplinary boundaries Finally Doing Environmental History invokes Worster s work as an essayist by offering self conscious reflections about the practice and purpose of environmental history The essays aim to provoke a discussion on the future of the field pointing to untapped and underdeveloped avenues ripe for further exploration A forward thinker like Worster presents bold challenges to a new generation of environmental historians on everything from capitalism and the Anthropocene to war and wilderness This engaging volume includes a very special afterword by one of Worster s oldest friends the eminent intellectual historian Daniel Rodgers who has known Worster for close to fifty years Novel Ecologies Allison Carruth,2025-03-04 Tracing the convergence of ecology and engineering over the last three decades this book pinpoints a new environmental paradigm that the author calls Nature Remade Allison Carruth s Novel Ecologies shows how the tech industry has taken up

the wilderness mythologies that shaped one strain of American environmentalism over the last century Calling this twenty first century environmental imagination *Nature Remade* Carruth describes a distinctly West Coast framework that is at once nostalgic and futuristic Through three case studies synthetic wildlife the digital cloud and space colonization the book shows *Nature Remade* to be a quasi religious belief in venture capitalism and big tech This paradigm thus imagines a future in which species ecosystems and entire planets are re generated and re created through engineering *Novel Ecologies* challenges the conviction that climate change and other environmental crises must be met with ever larger scale forms of technological intervention Against the new worlds conjured by Google Meta Open AI Amazon SpaceX and a host of lesser known start ups Carruth marshals writers and artists who imagine provisionally hopeful environmental futures while refusing to forget the histories that have made the world what it is On this track of the book Carruth discusses the works of Octavia Butler Becky Chambers Jennifer Egan Ruth Ozeki Craig Santos Perez Tracy K Smith Jeff VanderMeer Saya Woolfalk and many more Their novels poems installation artworks and expressive media offer a speculative world built on livable communities rather than engineered lifeforms

Environmental Criticism for the Twenty-First Century Stephanie LeMenager, Teresa Shewry, Ken Hiltner, 2011-05-09 *Environmental Criticism for the Twenty First Century* showcases the recent explosive expansion of environmental criticism which is actively transforming three areas of broad interest in contemporary literary and cultural studies history scale and science With contributors engaging texts from the medieval period through the twenty first century the collection brings into focus recent ecocritical concern for the long durations through which environmental imaginations have been shaped Contributors also address problems of scale including environmental institutions and imaginations that complicate conventional rubrics such as the national local and global Finally this collection brings together a set of scholars who are interested in drawing on both the sciences and the humanities in order to find compelling stories for engaging ecological processes such as global climate change peak oil production nuclear proliferation and food scarcity *Environmental Criticism for the Twenty First Century* offers powerful proof that cultural criticism is itself ecologically resilient evolving to meet the imaginative challenges of twenty first century environmental crises

New Statesman, 2010

Abundance Peter H. Diamandis, Steven Kotler, 2014-09-23 The authors document how four forces exponential technologies the DIY innovator the Technophilanthropist and the Rising Billion are conspiring to solve our biggest problems *Abundance* establishes hard targets for change and lays out a strategic roadmap for governments industry and entrepreneurs giving us plenty of reason for optimism

The Crisis in Global Ethics and the Future of Global Governance Peter Burdon, Klaus Bosselmann, Kirsten Engel, 2019 p p1 margin 0 0px 0 0px 0 0px 0 0px font 10 0px Arial This thought provoking book stimulates dialogue and action on the role of global ethics in the governance of individual societies and the international order Such inquiry is imperative given the extraordinary challenges that face the world today Leading figures in environmental ethics philosophy and law approach questions surrounding global ethics and governance

from a range of cultural and philosophical perspectives
