Karimianpour, 2011 Despotism fundamentalism and the rise of terrorism have created a puzzling moral question in the twenty first century how far should America go to help press ahead political and cultural change in the world Many Americans believe that we have a moral duty to help change the world for the better In 1965 the US replaced France as the main player on the Western side in the war in Vietnam A few years ago the US took ownership of the Saudi king's fear of Iran's nuclear capability Today the US is trying to replace South Korea in the South North Korean conflict Yet Washington's desire to take ownership of conflicts around the globe generates anti American sentiments in the conflict zones Our actions are often viewed by people in other parts of the world as meddling in their internal affairs This book explores five major historical transformations over the past two centuries and demonstrates the significance of internal leadership for social political and cultural change The reader will discover that while international pressure has often played a pivotal role in encouraging

change peaceful democratizations are historically not imposed from outside but are initiated and executed by leaders within the old system Written in easy and thought provoking language the book makes a valuable contribution to the discussion about our obligations and limitations for changing the world **1993** Patt Leonard, Rebecca Routh, 1996 Journal articles books book chapters book reviews dissertations and selected government publications on East Central Europe and the former Soviet Union published in the United States and Canada *Nationalism, Liberalism, and Progress* Ernst B. Haas, 2018-09-05 Far from being an inevitably aggressive and destructive force nationalism is for Ernst B Haas the primary means of bringing coherence to modernizing societies In the second volume of his magisterial exploration of this topic Haas emphasizes the benefits of liberal nationalism which he deems more progressive than other nation building formulas because it relies on reason to improve citizens lives The Dismal Fate of New Nations considers several societies that modernized relatively recently many of them aroused to nationalism by the imperialism of the old nation states The book probes the different patterns of development in emerging countries Iran Egypt India Brazil Mexico China Russia and Ukraine for insights into the possibilities and limitations of all nationalisms especially liberal nationalism Employing a systematic comparative perspective Haas organizes the book around the notion of change and its management by political elites in Asia Eastern Europe Latin America and the Middle East Haas particularly wants to understand how nationalism plays out in the politics of modernization within non Western cultures especially those where religions other than Christianity predominate Where the hold of religion remains formidable he argues the mixture of traditional and secular modernist institutions and beliefs will challenge the victory of liberal nationalism and the very success of nation state formation Soviet Politics Richard Sakwa, 2012-11-12 Soviet Politics in Perspective is a new edition of Richard Sakwa's successful textbook Soviet Politics an introduction Thoroughly revised and updated it builds on the previous editions comprehensive and accessible exploration of the Soviet system from its rise in 1919 to its collapse in 1991 The book is divided into five parts which focus on key aspects of Soviet politics They are historical perspectives beginning with the Tsarist regime on the eve of Revolution the rise and development of Stalinism through to the decline of the regime under Brezhnev and his successors and Gorbachev's attempts to revive the system institutions of Government such as the Communist Party security apparatus the military the justice system local government and participation theoretical approaches to Soviet politics including class and gender politics the role of ideology and the shift from dissent to pluralism key policy areas the command economy and reform nationality politics and foreign and defence policy an evaluation of Soviet rule and reasons for its collapse Providing key texts and bibliographies this book offers the complete history and politics of the Soviet period in a single volume It will be indispensable to students of Soviet and post Soviet politics as well as the interested general reader *Doing Bad by Doing Good* Christopher J Coyne, 2023-05-25 An economics focused analysis of why humanitarian relief efforts fail and how they can be remedied In 2010 Haiti was ravaged by a brutal earthquake that affected the lives of millions The call to assist those in

need was heard around the globe Yet two years later humanitarian efforts led by governments and NGOs have largely failed Resources are not reaching the needy due to bureaucratic red tape and many assets have been squandered How can efforts intended to help the suffering fail so badly In this timely and provocative book Christopher J Coyne uses the economic way of thinking to explain why this and other humanitarian efforts that intend to do good end up doing nothing or causing harm In addition to Haiti Coyne considers a wide range of interventions He explains why the US government was ineffective following Hurricane Katrina why the international humanitarian push to remove Muammar Gaddafi in Libya may very well end up causing more problems than prosperity and why decades of efforts to respond to crises and foster development around the world have resulted in repeated failures In place of the dominant approach to state led humanitarian action this book offers a bold alternative focused on establishing an environment of economic freedom If we are willing to experiment with aid asking questions about how to foster development as a process of societal discovery or how else we might engage the private sector for instance we increase the range of alternatives to help people and empower them to improve their communities Anyone concerned with and dedicated to alleviating human suffering in the short term or for the long haul from policymakers and activists to scholars will find this book to be an insightful and provocative reframing of humanitarian action Praise for *Doing Bad by Doing Good* Coyne is to be congratulated for a book that strongly calls into question the conventional wisdom that we must look first to government to accomplish humanitarian ends George Leef Regulation Magazine Coyne attempts to explain why conventional approaches to humanitarian aid and longer term economic development have failed miserably Recommended M Q Dao Choice Coyne offers a classic neo liberal economic analysis to explain why the humanitarian project in its current state is doomed Zoe Cormack Times Literary Supplement *Philosophy of Law* Walter E. Block, Roy Whitehead, 2019-11-14 Looking at discrimination education environment health and crime this volume analyses United States Supreme Court rulings on several legal issues and proposed libertarian solutions to each problem Setting their own liberal theory of law each chapter discusses the law at hand what it should be and what it would be if their political economic philosophy were the justification of the legal practice Covering issues such as sexual harassment religion markets in human organs drug prohibition and abortion this book is a timely contribution to classical liberal debate on law and economics

Economic Transition in Eastern Europe and Russia: Realities of Reform , An evaluation of the efficacy of different forms of liberalization since the fall of communism in Eastern Europe in the form of 13 essays on economic and political reforms Following an extensive introductory essay Economic Reform Appropriate Steps and Actual Policies the remaining essays are organized in three parts fundamental components of economic reform specific problems in reform and comparisons and evaluations Annotation copyright by Book News Inc Portland OR **The Neoliberal Revolution in Eastern Europe** Paul Dragos Aligica?, Anthony John Evans, 2009-01-01 Very few studies have ventured to explore the shift in economic ideas that were such a critical factor in shaping and understanding the East European transition process Paul Dragos Aligica and

Anthony J Evans have seized upon the potential that this crucial case has to illuminate the larger phenomenon of diffusion and adoption of economic ideas Two different but related research agendas are developed the study of the spread of neoliberalism as seen from the perspective of Eastern European post communist evolutions and the study of Eastern European transition as seen from an ideas centered perspective Combining a distinctive synthesis of the existing data about the spread of neoliberal economic ideas in Central and Eastern Europe with an analysis of the processes at work the authors challenge a series of misunderstandings and myths about the spread of neoliberal economic ideas The disputed topics include the myth of an Eastern European rush to embrace the theories and ideas that may be considered the mark of market fundamentalism the notion that a harsh neoliberal dogmatism was somehow imposed on the region from outside the idea that the standardization and regimentation of economic thinking was a result of the spread of the Western way of doing economics and the belief that the Eastern Europeans passively embraced this uniformity and standardization due to pressure from the Westerners This unusual synthesis will appeal to scholars in economics political science communist post communist studies and new institutionalism as well as policymakers

Defunct Federalisms Emilian Kavalski, Magdalena Zolkos, 2016-05-13 Since the end of the Cold War the global arena has become a place for dynamic change in particular for federal political units The focus on defunct federalisms draws attention not only to the difference between state making and nation building it also points to the fact that state making does not necessarily lead to the creation of a national identity This comparative volume looks at the track record of several defunct federalisms to identify options that have been overlooked and decisions that precipitated the collapse Bringing together insights from the study of state failure and federal collapse it examines the ways in which parallel assessment is crucial for suggesting the complex structures of identity accommodation in federal entities The volume is ideal for advanced undergraduates and graduate students as well as university lecturers and researchers working on the issues related to contemporary federalism history of federal units and the questions of national identity

Fighting the Diseases of Poverty Philip Stevens, 2017-07-05 Public discussion of global healthcare issues is dominated by those who believe that top down government driven interventions are the solution to the myriad health problems suffered by people in less developed countries This thinking is responsible for a plethora of harmful policies ranging from a drive towards socialized healthcare systems to calls for the centralization and semi nationalization of pharmaceutical research and development to impractical but grandiose UN sponsored schemes for tackling HIV AIDS and malaria In spite of the abysmal track record of top down approaches non governmental organizations and UN agencies continue to promote them to the detriment of the private sector economic development and human health The resulting politicization of diseases such as HIV AIDS has led to a diversion of resources away from more easily treatable diseases that affect more people Meanwhile cost effective and simple interventions such as vaccination are being subordinated to other more politically correct diseases This centralizing mindset has also resulted in many governments in less developed countries

attempting to plan and control universal healthcare systems which has encouraged rationing inequitable access and entrenched corruption It has also seriously undermined the effectiveness of overseas development aid Moreover the politicization of diseases such as HIV AIDS has led to a diversion of resources away from more easily treatable diseases that affect more people As a result cost effective and simple interventions are neglected by donors There has to date been little public discussion of the role of markets and their underlying institutions property rights and the rule of law in improving human health Economic growth and globalization has led to unprecedented improvements in human health The challenge is to enable the poorest countries to take part more fully in this process This work demonstrates how current

The Oxford Handbook of Austrian Economics Peter J. Boettke, Christopher J. Coyne, 2015 The Austrian School of Economics is an intellectual tradition in economics and political economy dating back to Carl Menger in the late 19th century Menger stressed the subjective nature of value in the individual decision calculus Individual choices are indeed made on the margin but the evaluations of rank ordering of ends sought in the act of choice are subjective to individual chooser For Menger the economic calculus was about scarce means being deployed to pursue an individual's highest valued ends The act of choice is guided by subjective assessments of the individual and is open ended as the individual is constantly discovering what ends to pursue and learning the most effective way to use the means available to satisfy those ends This school of economic thinking spread outside of Austria to the rest of Europe and the United States in the early 20th century and continued to develop and gain followers establishing itself as a major stream of heterodox economics The Oxford Handbook of Austrian Economics provides an overview of this school and its theories The various contributions discussed in this book all reflect a tension between the Austrian School's orthodox argumentative structure rational choice and invisible hand and its addressing of a heterodox problem situations uncertainty differential knowledge ceaseless change The Austrian economists from the founders to today seek to derive the invisible hand theorem from the rational choice postulate via institutional analysis in a persistent and consistent manner Scholars and students working in the field of History of Economic Thought those following heterodox approaches and those both familiar with the Austrian School or looking to learn more will find much to learn in this comprehensive volume

Foundations of Entrepreneurship and Economic Development David A Harper, 2003-03-13 This well written book is the first to deal with entrepreneurship in all its aspects It considers the economic psychological political legal and cultural dimensions of entrepreneurship from a market process perspective David A Harper has produced a volume that analyses why some people are quicker than others in discovering profit opportunities Importantly the book also covers the issue of how cultural value systems orient entrepreneurial vision and in contrast to conventional wisdom the book argues that individualist cultural values are not categorically superior to group oriented values in terms of their consequences for entrepreneurial discovery
