Why We Do What We Do Understanding Self Motivation:

Why We Do what We Do Edward L. Deci, Richard Flaste, 1995 Edward Deci one of the country's outstanding social psychologists writing with former New York Times science and health editor Richard Flaste offers some bad news and some good news Rewards and punishments do not make workers perform more effectively or students learn better or families function more smoothly that's the bad news Indeed it is the deadening of interest and commitment from too much control from overreliance on rewards and threats that keeps people from peak performance But the good news is that people have an innate energy interest and excitement about the world that can be encouraged and when they find greater satisfaction in what they do they are more effective Deci shows us how people work more efficiently learn more intelligently and treat each other better when their sense of autonomy is encouraged Give students the reasons why they need to learn something boring bring workers into the decision process whenever possible avoid the use of threats and amazing results will ensue because people are inherently interested in the world and they perform optimally when their autonomy is supported While this good news is a call for autonomy it is not a call for anarchy People need limits and structure but the way these are provided makes all the difference Reading this book will revolutionize the way we think about motivation and will give readers insight into what makes us tick **BOOK JACKET** Title Summary field provided by Blackwell North America Inc All Rights Reserved Why We Do what We Do Edward L. Deci, 1996 You reward your children for doing their homework they will usually respond by getting it done But is this the most effective method of motivation No says psychologist Edward L Deci who challenges traditional thinking and shows that this method actually works against performance The best way to motivate people at school at work or at home is to support their sense of autonomy Explaining the reasons why a task is important and then allowing as much personal freedom as possible in carrying out the task will stimulate interest and commitment and is a much more effective approach than the standard system of reward and punishment We are all inherently interested in the world argues Deci so why not nurture that interest in each other Instead of asking How can I motivate people we should be asking How can I create the conditions within which people will motivate themselves Publisher information *The Motivated Brain* Gayle Gregory, Martha Kaufeldt, 2015-09-17 What really motivates students to learn What gets them interested and keeps them interested in pursuing knowledge and understanding Recent neuroscientific findings have uncovered the source of our motivation to learn or as neuroscientist Jaak Panksepp terms it the drive to seek Seeking is what gets us out of bed in the morning the engine that powers our actions and the need that manifests as curiosity Informed by new findings on the nature of the brain's seeking system internationally renowned educators Gayle Gregory and Martha Kaufeldt have identified key brain friendly strategies for improving student motivation knowledge acquisition retention and academic success In this book readers will learn The science behind the motivated brain and how it relates to student learning Strategies for preparing a motivational environment and lesson Strategies for creating engaging learning experiences that capitalize on the brain's

natural ways of learning Strategies for improving depth of knowledge complex thinking and synthesis to get students into the ever desired state of flow How attention to the neuroscience of motivation will improve the classroom environment and student learning The Motivated Brain shows teachers how to harness the power of their students intrinsic motivation to make learning fun engaging and meaningful

Tackling the Motivation Crisis Mike Anderson, 2021-08-16 Packed with practical strategies you can use to create a culture of self motivation in your school Teachers use traditional incentive and reward systems with the best of intentions We re trying to support students positive behavior and learning We re hoping to motivate and inspire students to work hard and do well in school If everyone behaves we ll have a pizza party The more books you read the more stickers you ll receive On the surface these systems seem to make sense They may even seem to work But in the long term they do not foster intrinsic motivation or a love of learning In fact they often have the opposite effect In Tackling the Motivation Crisis How to Activate Student Learning Without Behavior Charts Pizza Parties or Other Hard to Quit Incentive Systems award winning educator and best selling author Mike Anderson explains The damage done by extrinsic motivation systems and why they are so hard for us to give up What intrinsic motivation looks like and the six high impact motivators autonomy belonging competence purpose fun and curiosity that foster it How to teach the self management and self motivation skills that can make a difference for kids How to use intrinsic motivation in curricula and instructional strategies feedback and assessment and discipline and classroom management Ultimately our job as teachers is not to motivate our students It s to make sure that our classrooms and schools are places that inspire their intrinsic motivation and allow it to flourish Anderson shows how you can better do that right away no matter what grade level or subject area you teach
