Charlie Foxtrot Kim Richard Nossal, 2016-12-10 Defence expert Kim Richard Nossal presents a damning indictment of defence procurement in Canada and shows how to fix it Defence procurement in Canada is a mess New equipment is desperately needed for the Canadian Armed Forces but most projects are behind schedule over budget or both Not only has mismanagement cost Canadian taxpayers hundreds of millions of dollars it has also deprived Canada and the CAF of much needed military capacity Successive governments both Liberal and Conservative have managed the complexities of defence procurement so poorly that it will take years before the Royal Canadian Navy the Royal Canadian Air Force and the Canadian Army regain the capabilities they need While new prime ministers invariably come to power promising to fix problems inherited from their predecessors getting it right has remained frustratingly elusive Charlie Foxtrot offers a fresh take on this important policy issue It shows why governments have found it so difficult to equip the CAF efficiently and offers a set of political prescriptions for fixing defence procurement in Canada

Ancient Rome Monica M. Bontty, 2020-03-17 This book shares little known facts from and excerpts of primary source documents to correct popular misconceptions about Ancient Rome and to show how those misconceptions became widespread Roman personalities and history have always had a larger than life profile in American popular culture but most people think of this ancient civilization as merely decadent cruel and elitist Most of our stereotypical conceptions of the empire and its people however are wrong This book corrects popular misconceptions about the ancient Roman world thus making ancient history relevant and accessible to modern readers and allowing modern critics of American politics and society to draw accurate comparisons Each chapter discusses how a particular misconception developed spread and evolved into what we now believe to be the historical truth Topics discussed include crucifixion the destruction of Carthage Julius Caesar s last words and Roman hygiene Excerpts from primary source documents provide evidence of both the rise of the historical fictions and the truths behind the myths

A History of Stepfamilies in Early America Lisa Wilson, 2014 History of Stepfamilies in Early America

Assessing the Use of Agent-Based Models for Tobacco Regulation Institute of Medicine, Board on Population Health and Public Health Practice, Committee on the Assessment of Agent-Based Models to Inform Tobacco Product Regulation, 2015-07-17 Tobacco consumption continues to be the leading cause of preventable disease and death in the United States. The Food and Drug Administration (FDA) regulates the manufacture, distribution, and marketing of tobacco products, specifically cigarettes, cigarette tobacco, roll-your-own tobacco, and smokeless tobacco, to protect public health and reduce tobacco use in the United States. Given the strong social component inherent to tobacco use, onset, cessation, and relapse, and given the heterogeneity of those social interactions, agent-based models have the potential to be an essential tool in assessing the effects of policies to control tobacco. **Assessing the Use of Agent-Based Models for Tobacco Regulation** describes the complex tobacco environment, discusses the usefulness of agent-based models to inform tobacco policy and regulation, presents an evaluation framework for policy-relevant agent-based models, examines the role and type of data needed to develop agent-based models for tobacco regulation, provides an assessment of the agent-based model developed for FDA, and offers strategies for using agent-based models to inform decision making in the future. **The Politics and Crisis Management of Animal Health Security** John Connolly, 2016-03-09 The Politics and Crisis Management of Animal Health Security addresses the 2001 foot-and-mouth epidemic in the United Kingdom, one of if not the most significant crises ever to face the UK farming industry. Underpinned by interviews with politicians and bureaucrats and with significant primary documentary analysis, the book shows that the crisis was a critical juncture in how disease outbreaks have been planned and managed ever since. The author explores how this event affected policy and governance arrangements for managing subsequent disease-induced threats such as avian influenza and bovine TB and concludes by considering the temporality of lesson learning by the UK government, including the current and future challenges associated with managing incongruent risks, e.g., flood protection, swine flu, and Ebola. This book provides students of public policy and administration with a significant illustration of how key concepts and analytical lenses from public policy can be applied to the study of the contours of practical policy change. **Publishers' Circular and Booksellers' Record of British and Foreign Literature**, 1914 **Design, When Everybody Designs** Ezio Manzini, 2015-03-06 The role of design, both expert and nonexpert, in the ongoing wave of social innovation toward sustainability. In a changing world, everyone designs; each individual person and each collective subject, from enterprises to institutions, from communities to cities and regions, must define and enhance a life project. Sometimes these projects generate unprecedented solutions; sometimes they converge on common goals and realize larger transformations. As Ezio Manzini describes in this book, we are witnessing a wave of social innovations as these changes unfold an expansive open co-design process in which new solutions are suggested and new meanings are created. Manzini distinguishes between diffuse design performed by everybody and expert design performed by those who have been trained as designers and describes how they interact. He maps what design experts can do to trigger

and support meaningful social changes focusing on emerging forms of collaboration These range from community supported agriculture in China to digital platforms for medical care in Canada from interactive storytelling in India to collaborative housing in Milan These cases illustrate how expert designers can support these collaborations making their existence more probable their practice easier their diffusion and their convergence in larger projects more effective Manzini draws the first comprehensive picture of design for social innovation the most dynamic field of action for both expert and nonexpert designers in the coming decades

British Books ,1914 **The Making and Remaking of Australasia** Tony Ballantyne,2022-12 This book explores the emergence of Australasia as a way of thinking about the culture and geography of this region Although it is frequently understood to apply only to Australia and New Zealand the concept has a longer and more complicated history Australasia emerged in the mid 18th century in both French and British writing as European empires extended their reach into Asia and the Pacific and initially held strong links to the Asian continent The book shows that interpretations and understandings of Australasia shifted away from Asia in light of British imperial interests in the 19th century and the concept was adapted by varying political agendas and cultural visions in order to reach into the Pacific or towards Antarctica The Making and Remaking of Australasia offers a number of rich case studies which highlight how the idea itself was adapted and moulded by people and texts both in the southern hemisphere and the imperial metropole where a range of competing actors articulated divergent visions of this part of the British Empire An important contribution to the cultural history of the British Empire Australia New Zealand and Pacific Studies this collection shows how Australasia has had multiple often contrasting meanings
