**Research Anthology on Supporting Healthy Aging in a Digital Society** Management Association, Information Resources, 2022-02-04 In today's rapidly evolving society there has been an increase in technologies and systems available to support the elderly throughout various aspects of life. We have come a long way in the quality of life we can offer our aging populations in recent years due to these technological innovations, medical advancements, and research initiatives. However, further study of these developments is crucial to ensure they are utilized to their utmost potential in securing a healthier elderly population. The *Research Anthology on Supporting Healthy Aging in a Digital Society* discusses the current challenges of aging in the modern world as well as recent developments in medicine and technology that can be used to improve the quality of life of elderly citizens. Covering a wide range of topics such as smart homes, remote healthcare, and aging in place, this reference work is ideal for healthcare professionals, gerontologists, therapists, government officials, policymakers, researchers, academicians, practitioners, scholars, instructors, and students.

**Exercise and Physical Activity for Older Adults** Danielle R. Bouchard, 2020-04-23 Go beyond aging theories and examine the physiological and physical impacts of aging. *Exercise and Physical Activity for Older Adults* takes a close look at the physical implications of the aging process and how health, physical activity, and exercise interact in aging adults. With an international team of contributors composed of leading experts from across the field of gerontology, *Exercise and Physical Activity for Older Adults* delivers comprehensive interdisciplinary coverage of the physical aging process and its effects on movement and exercise. Research on the physiological and physical implications of aging is presented, focusing on study outcomes and their practical application in optimizing healthy aging. Presented in an integrated and cohesive manner, this text is organized into four parts. Part I covers the theoretical foundations of biological aging, the implications of aging theories on medical research, and the social and economic impacts of demographic shifts due to population aging and global population size. Part II addresses age-related changes to the musculoskeletal, cardiovascular, pulmonary, and endocrine systems. Part III covers the physical effects of aging on other dimensions of life, including balance, motor control, and physical functions. Part IV focuses on exercise and older adults, taking an in-depth look at exercise measurements and the main barriers to regular exercise. One full chapter is devoted to recommendations for optimizing health for the general public, while another chapter is focused on performance by elite older athletes who exercise beyond functional fitness. Chapter objectives, end-of-chapter summaries, and review questions highlight key concepts and promote learning retention. Behavior Check sidebars look at the impacts of aging on behavior, how behavior affects physical health and activity, and how changes in behavior can improve everyday living. Functional Fitness Checkup sidebars focus on the performance of daily movements that are vital for older adults who want to maintain their physical independence. Putting It Into Practice elements provide examples of real-life application of the concepts presented, facilitating a practical understanding of how to use the content to benefit clients. A definitive resource for students and healthcare professionals who study physical aging, conduct clinical research, or work with older adults as clients and patients.

Exercise and Physical Activity for Older Adults helps readers understand the aging process and its effects on movement exercise and other dimensions of life      *Technologies for Active Aging* Andrew Sixsmith, Gloria Gutman, 2013-05-16 The challenge of population aging requires innovative approaches to meet the needs of increasing numbers of older people Emerging information and communication technologies ICTs such as pervasive computing and ambient assistive technology have considerable potential for enhancing the quality of life of many older people by providing additional safety and security while also supporting mobility independent living and social participation The proposed book will be a landmark publication in the area of technology and aging that will serve as a statement of the current state of the art and as a pointer to directions for future research and emerging technologies products and services      Sport Diver ,2005-10
