Wikipedia Reader's Guide John Broughton, 2008-05-05 *Wikipedia Reader's Guide The Missing Manual* gives you the essential tools for getting the most out of Wikipedia As a supplement to *Wikipedia The Missing Manual* this handbook provides a basic road map to the largest online collaborative encyclopedia You ll learn the best ways to search Wikipedia for the information you need how to navigate the encyclopedia by category and what to do if you spot an error in an article

Wikipedia John Broughton, 2008 Provides information on editing creating and maintaining Wikipedia articles collaborating with other editors formatting and illustrating articles and building a stronger encyclopedia **Wikipedia**, 2004 Opmbygget efter princippet om Open Source Alle kan skrive nye opslagsord og forklaringer ind i leksikonnet der s ledes hele tiden er under udvikling Findes p mange sprog bl a Introduction to Wikipedia Gilad James, PhD, Wikipedia is a free online encyclopedia that provides knowledge and information on various topics The website was launched in 2001 and is now one of the most popular sources of information on the web with millions of articles written in multiple languages Wikipedia is entirely written by volunteers worldwide who have a passion for sharing information and it is constantly updated to keep up with the latest information and research To ensure accuracy Wikipedia has certain policies regarding the sourcing of information which means only reliable sources can be used for content This helps to avoid misinformation and ensures that the information is trustworthy Additionally Wikipedia s open contribution model allows anyone to add edit or remove information making it an ever evolving source of knowledge and information Overall Wikipedia is an excellent resource for anyone who wants accurate information on diverse topics *A Discursive Perspective on Wikipedia* Susanne Kopf, 2022-10-05 This book provides a concise yet comprehensive guide to Wikipedia for researchers and students of linguistics discourse and communication studies redressing the gap in research on Wikipedia in these fields and encouraging scholars to explore Wikipedia further as a platform and a medium Drawing on Herring s situational and medium factors as well as related developments in critical discourse studies the author studies the online encyclopaedia both theoretically and empirically examining its origins production and consumption before turning to a discussion of its societal significance and function s This book will be of interest to Wikipedia scholars from a range of disciplines as well as those with a broader interest in linguistics discourse studies and the digital humanities Common Knowledge? Dariusz Jemielniak, 2014-05-14 With an emphasis on peer produced content and collaboration Wikipedia exemplifies a departure from traditional management and organizational models This iconic project has been variously characterized as a hive mind and an information revolution attracting millions of new users even as it has been denigrated as anarchic and plagued by misinformation Have Wikipedia s structure and inner workings promoted its astonishing growth and enduring public relevance In *Common Knowledge* Dariusz Jemielniak draws on his academic expertise and years of active participation within the Wikipedia community to take readers inside the site illuminating how it functions and deconstructing its distinctive

organization Against a backdrop of misconceptions about its governance authenticity and accessibility Jemielniak delivers the first ethnography of Wikipedia revealing that it is not entirely at the mercy of the public instead it balances open access and power with a unique bureaucracy that takes a page from traditional organizational forms Along the way Jemielniak incorporates fascinating cases that highlight the tug of war among the participants as they forge ahead in this pioneering environment

Facilitator's Guidebook for Use of Mathematics Situations in Professional Learning Rose Mary Zbiek, Glendon W. Blume, M. Kathleen Heid, 2018-01-01 The depth and breadth of a mathematics teacher's understanding of mathematics matter most as the teacher engages in the daily work of teaching One of the major challenges to teachers is to be ready to draw on the relevant mathematical ideas from different areas of the school curriculum and from their postsecondary mathematics experiences that can be helpful in explaining ideas to students making instructional decisions creating examples and engaging in other aspects of their daily work Being mathematically ready and confident requires teachers to engage in ongoing professional learning that helps them to connect mathematics to events like those they live on a daily basis The purpose of this volume is to provide teachers teacher educators and other facilitators of professional learning opportunities with examples of authentic events and tools for discussing those events in professional learning settings The work shared in Facilitator's Guidebook for Use of Mathematics Situations in Professional Learning Guidebook resulted from a collaborative effort of school mathematics supervisors and university mathematics educators The collaborators joined their varied experiences as teachers coaches supervisors teacher educators and researchers to suggest ways to scaffold activities encourage discussion and instigate reflection with teacher participants of differing mathematics backgrounds and with varying teaching assignments Each guide has ideas for engaging

and furthering mathematical thought across a range of facilitator and participant mathematics backgrounds and draws on the collaborators uses of the Situations with in service and prospective teachers The events and mathematical ideas connected to each event come from Situations in Mathematical Understanding for Secondary Teaching A Framework and Classroom Based Situations A Situation is a description of a classroom related event and the mathematics related to it For each of six Situations school and university collaborators developed a facilitator s guide that presents ideas and options for engaging teachers with the event and the mathematical ideas The Guidebook also contains suggestions for how teachers and others might develop new Situations based on events from their own classrooms as a form of professional learning Both teacher educators and school based facilitators can use this volume to structure sessions and inspire ideas for professional learning activities that are rooted in the daily work of mathematics teachers and students

Information Management

Fons Wijnhoven,2009-09-18 Information and its management is central to modern society Organizations private and public national and international have recognized that information is a key resource and that its management is critical for success Existing books on information management focus on the abilities of computers to process data the development of information systems and the management of IT resources They often start with the computer as a key issue Although Information Management acknowledges the importance of computers and data communication it starts from a deeper understanding of the concepts of information and knowledge and on the basis of this understanding derives methods to use computers effectively This textbook provides graduates of any discipline with an understanding of the theory and practice that underpins information management and introduces students to the concepts and applications of information management techniques in a variety of organizational contexts In giving students strong philosophical foundations Fons Wijnhoven s book will prove to be an excellent primer in information management

Trust-based Recommendations in

Multi-layer Networks Claudia Heß,2008 The huge interest in social networking applications Friendster com for example has more than 40 million users led to a considerable research interest in using this data for generating recommendations Especially recommendation techniques that analyze trust networks were found to provide very accurate and highly personalized results The main contribution of this thesis is to extend the approach to trust based recommendations which up to now have been made for unlinked items such as products or movies to linked resources in particular documents Therefore a second type of network namely a document reference network is considered apart from the trust network This is for example the citation network of scientific publications or the hyperlink graph of webpages Recommendations for documents are typically made by reference based visibility measures which consider a document to be the more important the more often it is referenced by important documents These two networks as well as further networks such as organization networks are integrated in a multi layer network This architecture allows for combining classical measures for the visibility of a document with trust based recommendations giving trust enhanced visibility measures Moreover an approximation approach

is introduced which considers the uncertainty induced by duplicate documents These measures are evaluated in simulation studies The trust based recommender system for scientific publications SPRec implements a two layer architecture and provides personalized recommendations via a web interface Discourse In and Through the Media Marina Bondi, Silvia Cacchiani, 2016-01-14 This book is a result of the 2013 CLAVIER Conference held in Modena in November 2013 and includes a selection of the papers presented on that occasion As the title suggests this volume encourages cross generic and cross disciplinary investigations in order to advocate integrated approaches to the study of media discourse regarding both theoretical background and practical applications Bringing together a wide range of case studies the book fosters debate on a variety of aspects related to the representation of specialised discourse in and through the media including for example voice and point of view argumentative practices knowledge construction multimodality the re contextualization and re conceptualization of knowledge opinion formation and peer to peer communication and popularization in and through traditional digital and social media Taken together the contributions to this volume provide extensive exemplification of the type of research currently being conducted on these issues The variety of the questions posed and the wide array of methods used here therefore represent a substantial contribution to sharpening existing knowledge and furthering the ongoing debate among scholars in the field **Advances in Intelligent Informatics, Smart Technology and Natural Language**
