Remembering the Cultural Geographies of a Childhood Home Peter Hughes Jachimiak, 2016-04-08 Using an innovative auto ethnographic approach to investigate the otherness of the places that make up the childhood home and its neighbourhood in relation to memory derived and memory imbued cultural geographies Remembering the Cultural Geographies of a Childhood Home is concerned with childhood spaces and children's perspectives of those spaces and consequentially with the personalised locations that make up the childhood family home and its immediate surroundings such as the garden the street etc Whilst this book is primarily structured by the author's memories of living in his own Welsh childhood home during the 1970s that is the auto ethnographic framework it is as much about living anywhere amid the remembered cultural remnants of the past as it is immersing oneself in cultural geographies of the here and now As a result Remembering the Cultural Geographies of a Childhood Home is part of the ongoing pursuit by cultural geographers to provide a personal exploration of the pluralities of shared landscapes whereby such an engagement with space and place aid our construction of cognitive maps of meaning that in turn manifest themselves as both individual and collective cultural experiences Furthermore touching upon our co habiting of ghost topologies Remembering the Cultural Geographies of a Childhood Home also encourages a critical exploration of children's spirituality amid the haunted cultural and geographical spaces and places of a house and its neighbourhood the cellar hallway parlour stairs bedroom attic shops cemeteries and so on

The Heart of the Woods Wyl Menmuir, 2024-07-30

The Heart of the Woods blends crafted narrative with stunning nature photography An eye opening study of trees humankind and the natural world **Trees in Paradise** Jared Farmer,2013-10-28 Describes how the first settlers in California changed the brown landscape there by creating groves wooded suburbs and landscaped cities through planting eucalypts in the lowlands citrus colonies in the south and palms in Los Angeles *The Book of Nature* Barbara Mahany,2023-03-21 We live inside a nautilus of prayer if only we open our senses and perceive what is infused all around Throughout millennia and across the monotheistic religions the natural was often revered as a sacred text By the Middle Ages this text was given a name The Book of Nature the first best entry point for encounter with the divine The very act of reading the world of focusing our attention on each twinkling star and unfurling blossom humbles us and draws us into sacred encounter As we grapple to make sense of today s tumultuous world one where nature is at once a damaged and damaging source of disaster as well as a place of refuge and retreat we are called again to examine how generously it awaits our attention and devotion standing ready to be read by all Weaving together the astonishments of science the profound wisdom and literary gems of thinkers poets and observers who have come before us and her own spiritual practice and gentle observation Barbara Mahany reintroduces us to The Book of Nature an experiential framework of the divine God s first revelation came to us through an ongoing creation one that through stillness and attentiveness to the rumblings of the heavens the seasonal eruptions of earth the invisible pull of migration of tide and of celestial shiftings draws us into sacred encounter We needn t look farther for the divine *Plant a Tree and Retree the World* Ben Raskin,2023-01-03 This handbook explains all the ways trees are essential for our climate our urban and rural environment our society and our mental health **The Shakespearean Forest** ,

Making One's Way in the World Martin Bell,2020-02-28 The book draws on the evidence of landscape archaeology palaeoenvironmental studies ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable The premise is that archaeologists tend to focus on sites while neglecting the patterns of habitual movement that made them part of living landscapes Evidence of past movement is considered in a multi scalar way from the individual footprint to the long distance path including the traces created in vegetation by animal and human movement It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations In other instances radical changes of axes of communication and landscape structures provide evidence of upheaval and social change Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning animal movement faeces deposition and transplantation which can create readable routes along which are favoured resources Evidence from European hunter gatherer sites hints at similar practices of niche construction on a range of spatial scales On a local scale footprints help to establish axes of movement the locations of lost settlements and activity areas Wood

trackways likewise provide evidence of favoured patterns of movement and past settlement location Among early farming communities alignments of burial mounds enclosure entrances and other monuments indicate axes of communication From the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long term continuity of routeways Where fields flank routeways a range of methods including scientific approaches provide dates Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and rather better evidence for early routes crossing topography and providing connections between different environmental zones The book concludes with a case study of the Weald of South East England which demonstrates that some axes of cross topographic movement used as droveways and generally considered as early medieval can be shown to be of prehistoric origin One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the parts played by riverine and maritime longer distance communication It is argued that understanding the origins of the paths we use today contributes to appreciation of the distinctive qualities of landscapes Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of connectivity between different landscape zones including fragmented nature reserves and valued places In these ways an understanding of past routeways can contribute to sustainable landscapes communities and quality of life

May,2016-03-16 August 1781 saw the publication of a manual on fox hunting that would become a classic of its genre Hugely popular in its own day Peter Beckford s *Thoughts on Hunting* is often cited as marking the birth of modern hunting and continues to be quoted from affectionately today by the hunting fraternity Less stressed is the fact that its subject was immediately controversial and that a hostile review which appeared on the heels of the manual s publication raised two criticisms of fox hunting that would be repeated over the next two centuries fox hunting was a cruel sport and a feudal anachronistic one at that This study explores the attacks made on fox hunting from 1781 to the legal ban achieved in 2004 as well as assessing the reasons for its continued appeal and post ban survival Chapters cover debates in the areas of class and hunting concerns over cruelty and animal welfare party politics the hunt in literature and nostalgia By adopting a thematic approach the author is able to draw out the wider social and cultural implications of the debates and to explore what they tell us about national identity social mores and social relations in modern Britain *On Roads* Joe Moran,2010-12-09 In this history of roads and what they have meant to the people who have driven them one of Britain s favourite cultural historians reveals how a relatively simple road system turned into a maze like pattern of roundabouts flyovers and spaghetti junctions Using a unique blend of travel writing anthropology history and social observation he explores how Britain s roads have their roots in unexpected places from Napoleon s role in the numbering system to the surprising origin of sat nav Full of quirky nuggets of history such as the day trips organised to see the construction of the M1 and the 2 5m Mills and Boons used to build the M6 Toll Road *On Roads* also celebrates innovators whose work we take for granted such as the designers of the road sign system On subjects ranging from speed limits to driving on the left and the non places where we stop to the unwritten laws of traffic jams these hidden stories have never been told together until now Affective Landscapes in Literature, Art and Everyday Life Christine Berberich,Neil Campbell,2016-03-09 Bringing together a diverse group of scholars representing the fields of cultural and literary studies cultural politics and history creative writing and photography this collection examines the different ways in
