Parnell, Patrick J. Driscoll, Dale L. Henderson,2011-03-16 Decision Making in Systems Engineering and Management is a comprehensive textbook that provides a logical process and analytical techniques for fact based decision making for the most challenging systems problems. Grounded in systems thinking and based on sound systems engineering principles, the systems decisions process SDP leverages multiple objective decision analysis, multiple attribute value theory and value focused thinking to define the problem, measure stakeholder value, design creative solutions, explore the decision trade off space in the presence of uncertainty and structure successful solution implementation. In addition to classical systems engineering problems, this approach has been successfully applied to a wide range of challenges including personnel recruiting, retention and management, strategic policy analysis, facilities design and management, resource allocation, information assurance, security systems design and other settings whose structure can be conceptualized as a system      *Digital Control Systems* Anastasia Veloni, Nikolaos Miridakis,2017-08-07 The objective of this book is to provide a collection of solved problems on control systems with an emphasis on practical problems. System functionality is described, the modeling process is explained, the problem solution is introduced and the derived results are discussed. Each chapter ends with a discussion on applying MATLAB, LabVIEW and/or Comprehensive Control to the previously introduced concepts. The aim of the book is to help an average reader understand the concepts of control systems through problems and applications. The solutions are based directly on math formulas given in extensive tables throughout the text      Automatic Control with Interactive Tools José Luis Guzmán, Ramon Costa-Castelló, Manuel Berenguel, Sebastián Dormido,2023-06-27 Automatic Control with Interactive
