Utopias and Architecture Nathaniel Coleman, 2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re invention of what is Through a detailed and innovative re assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper modern stance and orthodox modernist architecture

Thinking Through Twentieth-Century Architecture Nicholas Ray, 2023-02-08 Shortlisted for the Architectural Book Awards 2024 *Thinking Through Twentieth Century Architecture* connects the practice of architecture with its recent history and its theoretical origins those philosophical ideas that lay behind modernism and its aftermath By analyzing in straightforward and jargon free language the genesis of modernism and the complex reactions to it the book clarifies a continuing debate It has been specifically written to connect issues of theory history and contemporary practice and to allow students to make these connections easily This is a history of twentieth century architecture written with close critical attention to the theories that lie behind the works described Importantly unlike other historical accounts it does not take sides and urge the reader to identify with one strand of thinking or style of

architecture at the expense of others but it presents a dispassionate view with persuasive arguments on behalf of different positions. It pursues the history of European and American architecture chronologically but the history is interwoven with the philosophical ideas that informed both writers and architects and are essential for its understanding. The book is relevant to current issues of contemporary practice and education showing that philosophical issues are fundamental and those relating to design decisions never go away. It includes 200 illustrations and will appeal to all those interested in twentieth century architecture and to architectural students.

Architectural Regionalism Vincent B. Canizaro, 2012-03-20 In this rapidly globalizing world any investigation of architecture inevitably leads to considerations of regionalism. But despite its omnipresence in contemporary practice and theory architectural regionalism remains a fluid concept its historical development and current influence largely undocumented. This comprehensive reader brings together over 40 key essays illustrating the full range of ideas embodied by the term. Authored by important critics, historians and architects such as Kenneth Frampton, Lewis Mumford, Sigfried Giedion and Alan Colquhoun, *Architectural Regionalism* represents the history of regionalist thinking in architecture from the early twentieth century to today.

The Contested Territory of Architectural Theory Elie G. Haddad, 2022-10-21 This book brings together a diverse group of theoreticians to explore architectural theory as a discipline, assessing its condition and relevance to contemporary practice. Offering critical assessment in the face of major social and environmental issues of today, 17 original contributions address the relevance of architectural theory in the contemporary world from various perspectives including but not limited to politics, gender, representation, race, environmental crisis and history. The chapters are grouped into two distinct sections: the first section explores various historical perspectives on architectural theory, mapping theory's historiographical turn and its emergence and decline from the 1960s to the present; the second offers alternative visions and new directions for architectural theory, incorporating feminist and human rights perspectives and addressing contemporary issues such as Artificial Intelligence and the Age of Acceleration. This edited collection features contributions from renowned scholars as well as emergent voices with a Foreword by David Leatherbarrow. This book will be of great interest to graduate and upper level students of architecture as well as academics and practicing architects.

Site Matters Carol Burns, Andrea Kahn, 2005 This volume through theoretical essays and empirically grounded pieces on Le Corbusier's designs, contemporary suburbs and the planning agendas of the World Trade Center site provides theory on the appreciation of site and context in architecture.

The Historiography of Modern Architecture Panayotis Tournikiotis, 2001-02-27 The history of modern architecture as constructed by historians and key texts. Writing according to Panayotis Tournikiotis has always exerted a powerful influence on architecture. Indeed the study of modern architecture cannot be separated from a fascination with the texts that have tried to explain the idea of a new architecture in a new society. During the last forty years the question of the relationship of architecture to its history of buildings to books has been one of the most important themes in debates about the course of modern architecture.

Tournikiotis argues that the history of modern architecture tends to be written from the present projecting back onto the past our current concerns so that the beginning of the story really functions as a representation of its end In this book the buildings are the quotations while the texts are the structure Tournikiotis focuses on a group of books by major historians of the twentieth century Nikolaus Pevsner Emil Kaufmann Sigfried Giedion Bruno Zevi Leonardo Benevolo Henry Russell Hitchcock Reyner Banham Peter Collins and Manfredo Tafuri In examining these writers thoughts he draws on concepts from critical theory relating architecture to broader historical models The Spirit of Span Housing James Strike,2005

Faulder,2024-12-30 This book presents an original study of the work of Pritzker Prize winning Portuguese architect Álvaro Siza from the perspective of architecture as an interpretation of human life It combines philosophical hermeneutics narrative textual description and history and theory research to provide a rich account of Siza's work The book gives a detailed analysis of three of Siza's works from this perspective the Tidal Pool Piscina das Marés in Leça da Palmeira Portugal the Galician Centre of Contemporary Art Centro Galego de Arte Contemporánea in Santiago de Compostela Spain and the Santa Maria Church in Marco de Canaveses Portugal This form of analysis provides insight into the unique temporal dimension of Siza's work both in the memory inscribed by the structure and in how what is inscribed is revealed by degrees to those who come into contact with it Drawing on Hans Georg Gadamer and Paul Ricoeur this book defines both building and inhabiting

Spatial Theories for the Americas Fernando Luiz Lara, 2024-11-19 To study the built environment of the Americas is to wrestle with an inherent contradiction While the disciplines of architecture urban design landscape and planning share the fundamental belief that space and place matter the overwhelming majority of canonical knowledge and the vernacular used to describe these disciplines comes from another very different continent With this book Fernando Luiz Lara discusses several theories of space drawing on cartography geography anthropology and mostly architecture and proposes counterweights to five centuries of Eurocentrism The first part of *Spatial Theories for the Americas* offers a critique of Eurocentrism in the discipline of architecture problematizing its theoretical foundation in relation to the inseparability of modernization and colonization The second part makes explicit the insufficiencies of a hegemonic Western tradition at the core of spatial theories by discussing a long list of authors who have thought about the Americas To overcome centuries of Eurocentrism Lara concludes will require a tremendous effort but nonetheless we have the responsibility of looking at the built environment of the Americas through our own lenses *Spatial Theories for the Americas* proposes a fundamental step in that direction
