H Transport protein that provides a tube-like opening in the plasma membrane through which particles can diffuse

A Is used during active transport but not passive transport

C Process by which a cell takes in material by forming a vacuole around it

D Particle movement from an area of higher concentration to an area of lower concentration

F Process by which a cell expels wastes from a vacuole

B A form of passive transport that uses transport proteins

E Particle movement from an area of lower concentration to an area of higher concentration

G Transport protein that changes shape when a particle binds with it

Match the term with its correct description:

- | | |
|----------------------|----------------|
| a. transport protein | e. osmosis |
| b. active transport | f. endocytosis |
| c. diffusion | g. exocytosis |
| d. passive transport | h. equilibrium |

E The diffusion of water through a cell membrane

D The movement of substances through the cell membrane without the use of cellular energy

A Used to help substances enter or exit the cell membrane

B When energy is required to move materials through a cell membrane

H When the molecules of one substance are spread evenly throughout another substance to become balanced

G A vacuole membrane fuses (becomes a part of) the cell membrane and the contents are released

F The cell membrane forms around another substance, for example, how the amoeba gets its food

C When molecules move from areas of high concentration to areas of low concentration

Label the diagrams of cells using the following terms: diffusion, active transport, osmosis, equilibrium. The arrows show the direction of transport. You may use the terms more than once!
