We are pleased to put forth the Laboratory Manual of Biochemistry. This manual prepared according to the PCI B Pharm course regulations 2014 is divided into four sections: qualitative analysis, quantitative analysis, estimation of blood parameters, and catalytic role of enzymes. The methods of all the experiments are drawn from the latest editions of official books such as the Indian Pharmacopoeia and research papers, ensuring the inclusion of the latest advancements in methodologies or apparatus. This manual is designed for outcome-based education. Each experiment follows a uniform format with sections for practical significance, practical outcomes, PrOs mapping with course outcomes, theory resources used, procedure, precautions, observations, results, conclusion, references, and synopsis questions. Each experiment offers an opportunity for students to perform practical work, developing proficiency in effectively managing equipment, handling glassware, chemicals, reagents, and

writing analytical reports In addition the questions at the end of the experiments help to enhance students knowledge benefiting them as they pursue higher studies During the laboratory period you will need to juggle multiple tasks while performing the experiment It is essential to document your actions and observations thoroughly as you proceed Always plan your work ahead considering what you are doing why you are doing it what is happening and what conclusions you can draw from your experiment We acknowledge the help and cooperation of various individuals in bringing out this manual We are highly indebted to the authors of the books and articles mentioned in the references which were a major source of information for this manual We also thank the publishers designers and printers who worked hard to publish this manual in a timely manner We hope that this manual will be helpful to students in understanding concepts principles and performing procedures We wish you all the best
