Diagnostic Biomedical Signal and Image Processing Applications With Deep Learning Methods Kemal Polat, Saban Öztürk, 2023-04-30 Diagnostic Biomedical Signal and Image Processing Applications with Deep Learning Methods presents comprehensive research on both medical imaging and medical signals analysis. The book discusses classification, segmentation, detection, tracking, and retrieval applications of non-invasive methods such as EEG, ECG, EMG, MRI, fMRI, CT, and X-RAY amongst others. These image and signal modalities include real challenges that are the main themes that medical imaging and medical signal processing researchers focus on today. The book also emphasizes removing noise and specifying dataset key properties with each chapter containing details of one of the medical imaging or medical signal modalities. Focusing on solving real medical problems using new deep learning and CNN approaches, this book will appeal to research scholars, graduate students, faculty members, R&D engineers, and biomedical engineers who want to learn how medical signals and images play an important role in the early diagnosis and treatment of diseases. Investigates novel concepts of deep learning for acquisition of non-invasive biomedical image and signal modalities for different disorders. Explores the implementation of novel deep learning and CNN methodologies and their impact studies that have been tested on different medical case studies. Presents end-to-end CNN architectures for automatic detection of situations where early diagnosis is important. Includes novel methodologies, datasets, design, and simulation examples.
