

A Career Journey of Becoming a Nurse

5 pages | 1057 words

I like to help and nurture people back to health, so why not join a profession which consists of that? Nursing goes along well with what I'm best at, it might be the ideal profession for me. Where I can enjoy helping people and looking after them to make them feel better. If they are ill, I want to help figure out what is causing them to feel that way or what the signs are of the possible health problems. I'm also an extremely social individual and can talk with anybody, which is something required if you wish to end up being a nurse. However what does it take? Will the money spent going to school be repaid or more by the profession I have chosen? Well we're about to find out! Prior to you choose what career to choose for life, you require to take a look at whatever. Where to go, what school has the best programs, would it be better to get a degree, what advantages it has for family matters, just how much it pays, can it support the lifestyle you're trying to find in life, and just how much time you can leave. There are numerous more but how can you believe through all of them in such a brief amount of time? Even two to three years won't be good enough to think of all the concerns. But what I am going to do is respond to the most crucial concerns that you must consider in the period of time leading up to the time you need to pick the profession you will be doing for the rest of your life or for a majority of your life. Among the most important questions you need to think about would be, what do you delight in to do the most in your life? If you think about being a nurse as one the possibilities you might be delighted providing for fifty years or two, then select it. I have actually read several posts online and they all talk about how most nurses want that they never ever entered into that profession in the very first place. Though it does have flexible hours and household friendly time off, you have to continuously be on your feet running around all over the location, keep an eye on many doctors patients and paper work, and work really long hours maybe even graveyard shifts. But some say, just how much you delight in being a registered nurse is your attitude towards all the rush and stress. A lot enjoy their tasks and a lot don't enjoy it also. All of it depends upon your outlook on the task. You must also consider where you want to go. Find out where the best place to go would be, and who has the greatest nursing programs. If you can afford a really good college then go there, but if you are working on a low income and have a family and house to take care of then it may not be the best idea to go somewhere out of your budget....

Indigenous Women, Work, and History Mary Jane Logan McCallum,2014-05-02 When dealing with Indigenous women s history we are conditioned to think about women as private sphere figures circumscribed by the home the reserve and the community Moreover in many ways Indigenous men and women have been cast in static pre modern and one dimensional identities and their twentieth century experiences reduced to a singular story of decline and loss In *Indigenous Women Work and History* historian Mary Jane Logan McCallum rejects both of these long standing conventions by presenting case studies of Indigenous domestic servants hairdressers community health representatives and nurses working in modern Native ways between 1940 and 1980 Based on a range of sources including the records of the Departments of Indian Affairs and National Health and Welfare interviews and print and audio visual media McCallum shows how state run education and placement programs were part of Canada s larger vision of assimilation and extinguishment of treaty obligations Conversely she also shows how Indigenous women link these same programs to their social and cultural responsibilities of community building and state resistance By placing the history of these modern workers within a broader historical context of Aboriginal

education and health federal labour programs post war Aboriginal economic and political developments and Aboriginal professional organizations McCallum challenges us to think about Indigenous women s history in entirely new ways

Nursing against the Odds Suzanne Gordon, 2012-05-15 In the United States and throughout the industrialized world just as the population of older and sicker patients is about to explode we have a major shortage of nurses Why are so many RNs dropping out of health care s largest profession How will the lack of skilled experienced caregivers affect patients These are some of the questions addressed by Suzanne Gordon s definitive account of the world s nursing crisis In *Nursing against the Odds* one of North America s leading health care journalists draws on in depth interviews research studies and extensive firsthand reporting to help readers better understand the myriad causes of and possible solutions to the current crisis Gordon examines how health care cost cutting and hospital restructuring undermine the working conditions necessary for quality care She shows how the historically troubled workplace relationships between RNs and physicians become even more dysfunctional in modern hospitals In Gordon s view the public image of nurses continues to suffer from negative media stereotyping in medical shows on television and from shoddy press coverage of the important role RNs play in the delivery of health care Gordon also identifies the class and status divisions within the profession that hinder a much needed defense of bedside nursing She explains why some policy panaceas hiring more temporary workers importing RNs from less developed countries fail to address the forces that drive nurses out of their workplaces To promote better care Gordon calls for a broad agenda that includes safer staffing improved scheduling and other policy changes that would give nurses a greater voice at work She explores how doctors and nurses can collaborate more effectively and what medical and nursing education must do to foster such cooperation Finally Gordon outlines ways in which RNs can successfully take their case to the public while campaigning for health care system reform that actually funds necessary nursing care
