

Big Data in Accounting

PROGRESS

81%

The use of big data affects accounting in many ways. It influences how businesses can improve budgets, plans and forecasts; determine strategy; reduce operational costs; and detect fraud. It can also shape how financial statements are prepared and audited.

Because accountants are already immersed within IT, financial systems, and reporting; and serve as the go-between for upper management, operations, and external stakeholders, they are well positioned to take a leading role if they understand the applications for big data.
