**The Practice of Reproducible Research** Justin Kitzes, Daniel Turek, Fatma Deniz, 2018 The Practice of Reproducible Research presents concrete examples of how researchers in the data-intensive sciences are working to improve the reproducibility of their research projects. In each of the thirty-one case studies in this volume, the author or team describes the workflow that they used to complete a real-world research project. Authors highlight how they utilized particular tools, ideas, and practices to support reproducibility.

emphasizing the very practical how rather than the why or what of conducting reproducible research Part 1 provides an accessible introduction to reproducible research a basic reproducible research project template and a synthesis of lessons learned from across the thirty one case studies Parts 2 and 3 focus on the case studies themselves The Practice of Reproducible Research is an invaluable resource for students and researchers who wish to better understand the practice of data intensive sciences and learn how to make their own research more reproducible **The Practice of Crowdsourcing**

Omar Alonso,2022-06-01 Many data intensive applications that use machine learning or artificial intelligence techniques depend on humans providing the initial dataset enabling algorithms to process the rest or for other humans to evaluate the performance of such algorithms Not only can labeled data for training and evaluation be collected faster cheaper and easier than ever before but we now see the emergence of hybrid human machine software that combines computations performed by humans and machines in conjunction There are however real world practical issues with the adoption of human computation and crowdsourcing Building systems and data processing pipelines that require crowd computing remains difficult In this book we present practical considerations for designing and implementing tasks that require the use of humans and machines in combination with the goal of producing high quality labels *Proceedings of the 2022 5th International Conference on Humanities Education and Social Sciences (ICHESS 2022)* Augustin Holl,Jun Chen,Guiyun
